Global Reach, Local Expertise

As a true partner, we are focused on getting your audit program up and running without unnecessary delays. Our approach to developing audit strategies is based on a combination of our client's specific requirements, a detailed playbook that is proven in thousands of real-world vendor audits, and our extensive Big 4 experience with thousands of compliance engagements under our belt.

We understand what it takes to properly service a global organization. It's critical, from an operations and cost management perspective, to have native speakers on the ground that are not only seasoned compliance experts but have deep subject matter and industry experience to help you navigate the challenges of doing business in foreign countries.

We have established offices in strategic locations across the world and have consulting resources in the US, EMEA, and APAC.
