

The Egnyte Gen4 Platform Plans

Starter | IFS | Elite | Ultimate

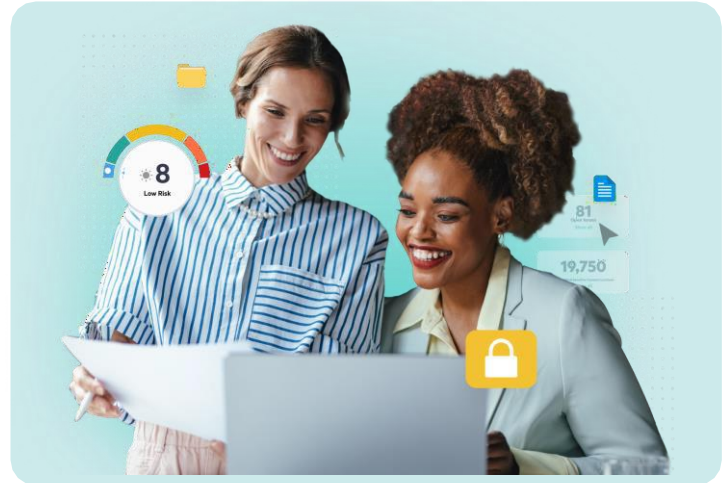

For most organizations, the information buried in their corporate content is their most valuable untapped knowledge asset, and the most risk exposed.

To turn their data into intelligence, while still protecting it from internal and external threats, companies need a single platform that combines the power of cloud content management, data security, and AI into one content cloud platform.

Egnyte allows any size company to discover insights and collaborate securely anywhere on any device, while still ensuring their content remains safe and compliant.

Egnyte offers four plan options on the Gen4 Platform:

- **Starter**
- **Elite**
- **IFS**
- **Ultimate**

About Egnyte

- Founded in 2008
- 1000+ Employees across US, UK, Europe, APAC
- Focused on Mid-Sized Companies and Highly Regulated Industries
- Vertical Solutions: AEC, Life Sciences, Financial Services, Public Sector
- Trusted by 22,000+ Customers Worldwide

AI-powered Insights

Predictive and Generative AI with answers grounded in your company's data.

Controlled Sharing & Collaboration

Locate, share and co-edit large files worry-free, regardless of location, device or document size.

PDF Annotation & Editing

Preview, annotate, and edit PDF documents with a secure and intuitive solution built into the flow of work

Content Workflows

Improve productivity with pre-built and customizable workflows, including eSignature.

Content Lifecycle Management

Gain complete control and flexibility over content from data migration, retention, archival, and deletion.

Data Access Governance

Reduce risk and improve business processes by controlling users' access to critical files, quickly and easily.

Insider Risk Management

Reduce data risk caused by accidental or malicious user actions, with automated sensors and mitigation.

Ransomware Detection

Rapidly detect and respond to ransomware attacks and protect your sensitive data with behavioral and signature-based detection.

Data Privacy & Compliance

Gain visibility and control over structured and unstructured personal data, across cloud and on-premises repositories.
