

# Egnyte Copilot

Transcending Barriers to Accelerate AI Adoption and Unlock Potential

In the era of rapid technological growth, leveraging Artificial Intelligence (AI) and Machine Learning (ML) presents several challenges for organizations. These include a pronounced skill gap in AI and ML expertise, the necessity for meticulous data management and controlling sprawl, issues of trust and explainability, the complexity of integration into existing IT systems, persistent security and privacy concerns, and ensuring business data is always safe and retrievable.

Financial hurdles, such as high costs and uncertain return on investment (ROI), further deter AI adoption.

Recognizing these challenges, Copilot skillfully tackles them by enhancing data security, streamlining operations, fostering collaboration and simplifying AI integration. This approach propels organizations towards strategic, customer-focused success, transforming AI adoption from a daunting task into a strategic triumph.

**Elevate productivity using Egnyte's Secure, AI-powered interface grounded in your company's data.**

## Speed Up Information Retrieval

- Accelerate decision-making and innovation by quickly surfacing insights in your knowledge base

## Summarize Dense Files

- Save time by summarizing large documents instantly

## Brainstorm Ideas and Create First Drafts

- Unleash creativity across the entire organization with automated idea generation and content creation

## The Egnyte Difference

Purpose-built AI to meet you on your terms

### Private

- Secure your data with stringent privacy, compliance, and security standards; the AI respects Egnyte's governance model and adheres to user-specific permissions.

### Practical

- Integrate our AI seamlessly into your existing workflows; no new tools or special skills are required, and no need to move data from where it lives in Egnyte.

### Purposeful

- Receive answers grounded in your company data—accurate, relevant, and completely traceable, with full control over the data and prompts guiding the AI's responses.

# Egnyte Copilot

Transcending Barriers to Accelerate AI Adoption and Unlock Potential

The image is a collage of screenshots demonstrating the Egnyte Copilot interface. It includes:

- A file manager view of "4th Gen Packages" with a context menu open, highlighting the "Ask" action.
- A PDF viewer showing a document titled "Egnyte Copilot Datasheet.pdf" with a chat interface asking: "what are the key things a business can do with copilot - useful real life examples for small businesses?". The document text describes Copilot's functionalities for small businesses, such as speeding up information retrieval and summarizing dense files.
- A dashboard view showing various AI agents:
  - 7 Layer PPT Generator**: 7 Layer PPT Generator (Shared Access)
  - AI News Research**: Research and create a summary of the latest news related to AI / LLM tools from the last week (Shared Access)
  - All Employees Agent**: Fetch answers from documents (Shared Access)
  - Building Code Analyst**: Streamline the often complex process of navigating building codes and construction regulations for professionals in the... (Shared Access)
  - Case Law Research**: search the web and find cases related to the users request, prioritize results from last 3 months
  - Clause Expert**: AI-powered contract analyst agent that identifies legal risks and exposures in contract clauses and delivers clear... (Shared Access)
  - Content Generator**: Generate clear, professional content in seconds — from job descriptions to blog posts, and more. (Shared Access)
  - Contracts Analyst**: This SmartApp draw insights from contracts to create a holistic view (By Egnyte)
- A "Knowledge Bases" section showing active bases:
  - All Employees**: information about company policies values and holidays (Employees, 2 months ago)
  - CIMs**: (CIMs, 7 months ago)
  - Building codes**: (Building Codes, 10 months ago)
  - Building Codes**: (building\_codes, 9 months ago)
  - CIMs**: (CIMs, 1 year ago)
