

# Unplug Hidden Energy Waste

Implementing smart solutions with measurable.energy to unlock 20% more savings

## AT A GLANCE

Measurable energy & cost savings

**38%**

Reduction in  
energy use

**57%**

Savings in  
energy cost

## ABOUT THE CUSTOMER

PKF Francis Clark are an award-winning firm of chartered accountants and business advisers. The business was looking for innovative technology to drive substantial cost savings and enhance sustainability in office environments.

## THEIR AIMS

The office in question, spanning 24,377 sq. ft. faced significant energy waste attributed to 'plug power' waste. The aim was to enhance energy efficiency and reduce operational costs in this flagship property.

## HOW WE HELPED

measurable.energy's AI-powered sockets were installed into PKF Francis Clark's office to identify and reduce unnecessary energy consumption by devices plugged into them.

By using machine learning, the system automatically detects and manages power usage, ensuring devices are only consuming energy when necessary, and turns them off when not in use. The deployment of measurable.energy's technology led to significant energy savings.

**"This technology has been instrumental in our efforts to operate more sustainably and efficiently."**
