BergoLED
Speed Repair System
Smart Repair at the Speed of Light

BERGOLIN

PROTECTING
YOUR PERFORMANCE

Speed, durability, and easy processing

The BergoLED Speed Repair **cuts maintenance time by up to 90%** while maintaining durability, reducing costs and extending component life.

Works on GFRP, metal, plastic, concrete, wood

Cures fast with instant UV protection

Fast curing, safe to use

Putty and resin cure in minutes – **up to 90% faster than conventional systems**. Both are free of solvents and isocyanates.

Reliable curing even in extreme temperatures

The putty comes in tubular bags, and the **UV LED lamps** are battery-powered – ideal for flexible, on-site use.

UV marker for full cure

A built-in UV marker clearly shows when the material has cured and is ready for further processing.

1K system – no mixing needed

Processing is simple and reliable thanks to **the single-component formula** – no need for time-consuming mixing.

Resin and Putty Two Solutions, One Goal. Fast, Reliable Repairs

The BergoLED Speed Repair System **cuts maintenance time by up to 90%** while maintaining durability, reducing costs and extending component life.

Resin
BergoLED Resin 1L1000-O

For quick repair of structural damage

- Single-component resin for quick repair of structural damage
- Ideal for conventional fibreglass (FRP) repairs
- Suitable for all repair methods: Hand laminating, vacuum pressing, and infusion
- Environmentally friendly with no VOC emissions
- Can also be used with your own UV lamps after consultation

Filler
BergoLED Putty 4L1000

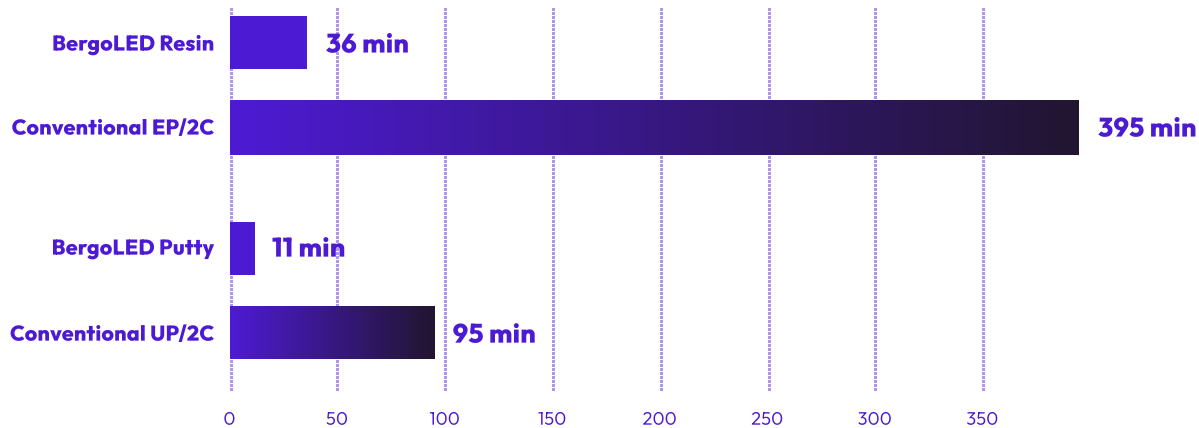

For quick repairs of surface defects

- Quick repair of surface damage
- Suitable for fibreglass (FRP), steel, aluminium, plastic, concrete, or wood
- Single-component filler, no mixing required
- Exceptional UV stability for maximum longevity
- Can also be used with your own UV lamps after consultation
- Patented technology

Products can also be used with your own UV lamps after consultation.

Repair Time Comparison.

BergoLED Speed Repair vs. Conventional Systems.

Save Over \$2,900 on Each Repair

Standard epoxy repairs on a 4 MW turbine can cost up to \$3,000 due to long curing times. BergoLED Resin cures in 5 minutes, cutting the total cost to under \$50.
