# Bringing Light Into The Darkness

01

# Introduction

---

Ground9 flooring is a specialized company in industrial flooring. It was established in the beginning of 2019. In Egypt, ancient ancestors were very passionate about building, construction, architecture and decoration and this passion is now increasing as seen in new cities and compounds so, we decided to fill a gap in one of the most important elements in pre-mentioned interests of Egypt people, floors. but because Egypt worth more than just filling a gap, we are providing a unique solutions and services of industrial floors. With our professional team, new techniques, and modern machines, we are aiming to change the perspective of industrial floors in Egypt

## Mission

Ground9 flooring company installs all kinds of industrial flooring with a very professional technical team, new techniques and modern machines to provide a cost-effective service suits the rapid development of construction field in Egypt and Middle East area.

## Vision

We are aiming to be the first industrial flooring company in Egypt and Middle East by providing a great valuable industrial floors services that will totally change the perspective of floors.

# INNOVATIVE FLOORING SOLUTIONS

02

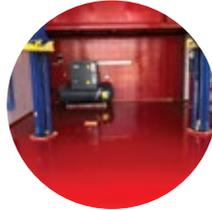

# OUR SERVICES

As part of our vision, Ground 9 invested in our staff machinery in order to provide quality services in the following fields:

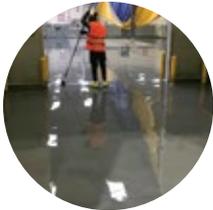

Terrazzo Floors

Epoxy Floor Coating

Epoxy Floor Self-Leveling

Epoxy Floor Anti-Static

Epoxy Flakes Floor

Polyurethane Floor Coating

Polyurethane Screed Floor

Cementitious Self-Leveling Floor

Cementitious Waterproofing

Polished Concrete Floor

Expansion Joints Treatment

Sport Floors

# TERRAZZO FLOORS

## What Are Terrazzo Floors?

is a composite material, poured in place or precast, which is used for floor and wall treatments. It consists of chips of marble, quartz, granite, glass, or other suitable material, poured with a cementitious binder (for chemical binding), polymeric (for physical binding), or a combination of both. Metal strips often divide sections, or changes in color or material in a pattern. Additional chips may be sprinkled atop the mix before it sets. After it is cured it is ground and polished smooth or otherwise finished to produce a uniformly textured surface.

## AREAS OF APPLICATION :

Hospitals , Airport terminal , Stairs , Restaurants , Hotel receptions , Shopping centers , University

# EPOXY FLOOR COATING

## WHAT IS EPOXY FLOOR COATING ?

Epoxy is a material that acts as a sealant for concrete floors. Epoxy coatings can be used on floors for commercial buildings, walkways, even on walls or ceilings at times, and most commonly on garage floors.

## BENEFITS :

- Durability .
- Strength
- Saves time
- Low maintenance cleaning .
- Aesthetic
- Chemically resistant
- Safety
- Brightness
- Lowers vehicle maintenance
- Helps the environment

## AREAS OF APPLICATION :

Engineering and pharmaceutical industries , clean rooms , laboratories , hospitals , packing , storage areas high technology industrial use , warehouses subject to light/ medium traffic , manufacturing , assembly , automotive aerospace industries , car parks.

# EPOXY FLOOR SELF-LEVELING

## WHAT IS EPOXY FLOOR SELF-LEVELING?

Self leveling epoxy can be applied over concrete floors to create a durable, low maintenance flooring surface. Specifically, self leveling epoxy flooring can be applied over old cracked and damaged concrete floors to create a smooth, seamless surface. This is because during application the epoxy spreads out to fill cracks or chips in concrete floors.

## BENEFITS :

- High scratch and impact resistance
- Chemical and heat resistance
- Slip resistant, even when wet
- High gloss, appealing finish .
- Easy to clean smooth, seamless finish
- Attractive, bright color options
- Variable thicknesses for versatile application

## AREAS OF APPLICATION :

Engineering and pharmaceutical industries , clean rooms , laboratories and hospitals , packing and storage areas high technology industrial use , warehouses subject to light/ medium traffic , manufacturing and assembly , automotive aerospace industries and car parks.

# EPOXY FLOOR ANTI-STATIC

## WHAT IS EPOXY FLOOR ANTI-STATIC?

Electrical charges can have catastrophic consequences in static sensitive environments such as those in Electronics, Chemical, even Pharmaceutical and Healthcare facilities. Anti-static flooring from Gound 9 safeguards both sensitive electronic equipment and personnel from an electrostatic discharge (ESD). Anti-static flooring typically contains a conductive material that accumulates static electricity to drain or dissipate any potential static discharge and needs to be grounded or earthed.

## AREAS OF APPLICATION :

Food , pharmaceutical , manufacturing industries clean rooms , laboratory , packing halls and warehouse applications.

## Benefits :

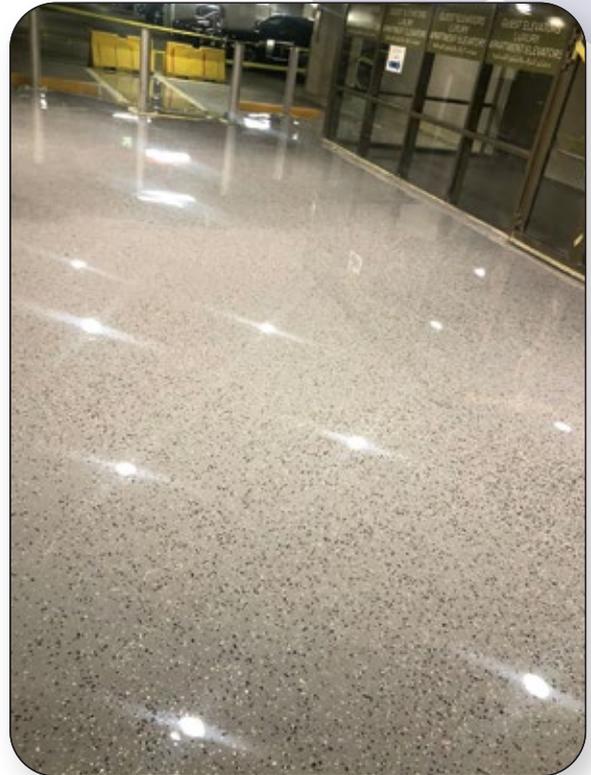

- Help in preventing explosions and fires
- Helping to reduce the risk of costly damage to equipment and injury to personnel
- Safeguard against ESDs

# EPOXY FLAKES FLOOR

## WHAT IS EPOXY FLAKES FLOOR?

Epoxy flakes floors are designed to increase the durability of your epoxy floors while offering a high-quality finish.

These epoxy flakes/chips offer texture and color to your clear/transparent epoxy floors. Add some color and texture to your garage or industrial floors for an affordable price.

## Areas of applications:

Administrative offices, commercial buildings, reception entrances, garage floors and sales stores

# POLYURETHANE FLOOR COATING

## WHAT IS POLYURETHANE FLOOR COATING ?

Polyurethane is a thermosetting polymer that has been used for many years as a protective & decorative coat for concrete floors.

Concrete floors are coated with liquid Polyurethane to make them durable & well maintained, as they can be vulnerable to different kinds of physical damage. Polyurethane flooring also acts as a waterproofing layer to prevent concrete (substrate) cracks from moving through the coating and appearing on the surface.

## Areas of applications:

Outdoor floors, multi-store parking, hospitals, factories and commercial facilities.

# POLYURETHANE SCREED FLOORS

## WHAT IS POLYURETHANE SCREED FLOORS?

Providing a durable floor surface with excellent properties for mechanical and chemical resistance, it is suited to the most demanding of work environments.

Suitable for use in a variety of industrial and commercial areas, PU resin screeds are hygienic, easy to clean and maintain. They can have a coving fitted and can also be steam cleaned making them the ideal choice in areas where hygiene is of the utmost importance.

## Areas of applications:

**Food Industry Factories**  
**Factories freezing areas**

# CEMENTITIOUS SELF-LEVELING FLOOR

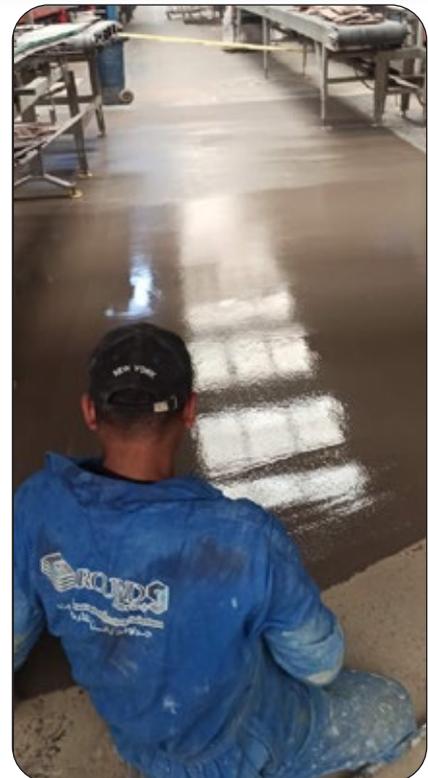

## WHAT IS CEMENTITIOUS SELF-LEVELING FLOOR ?

Self-leveling concrete is a polymer-modified cement used to create high-compressive smooth flat surfaces. It does not require large volumes of water and can work on any non-flexible surface, including wood, ceramic tiles, plywood, and concrete. It is easy, quick to install, and useable before or after construction. It also creates smooth and flat floors on tile, plywood, or concrete floors. Therefore, self-leveling concrete helps reduce instances of damage and repair costs.

## Areas of applications:

Garages, parking floors, outdoors areas, concrete, stores, and commercial facilities

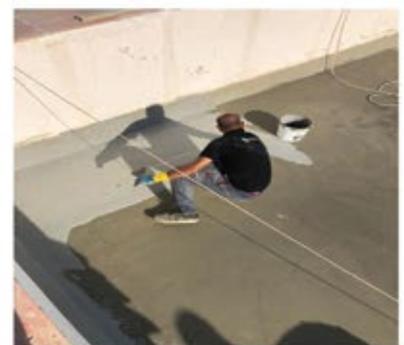

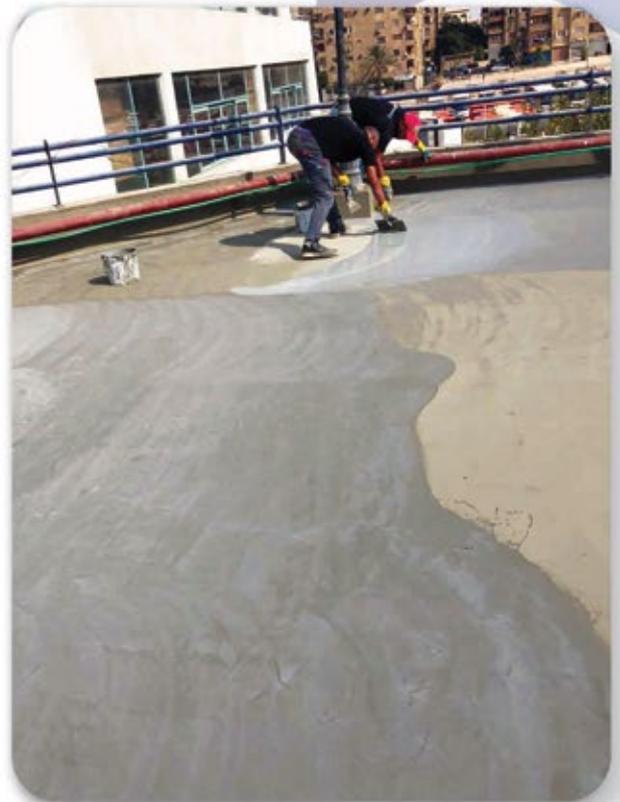

# CEMENTITIOUS WATERPROOFING

## WHAT IS CEMENTITIOUS WATERPROOFING?

Waterproofing Roofing is committed to a proactive health and safety program aimed at protecting our staff, our clients property, and the environment from injury or damage.

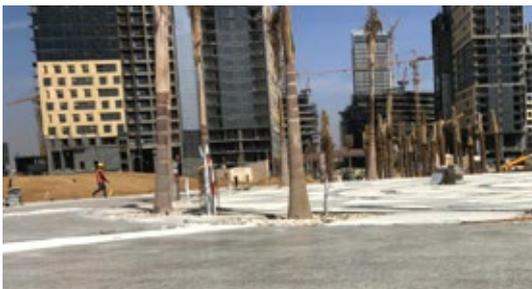

Within the waterproofing industry, below-ground waterproofing is generally divided into Tanking. This is waterproofing used where the below-ground structure will be sitting in the water table continuously or periodically. This causes hydrostatic pressure on both the membrane and structure, and requires full encapsulation of the basement structure in a tanking membrane, under slab and walls

# POLISHED CONCRETE FLOOR

## What Is Polished Concrete Floor?

Polished concrete is much like standard concrete with chemical densifiers added to fill the pores to give a dense, durable matrix. The surface is then ground down with diamond polishing tools to achieve the required level of smoothness, shine and finish specified.

## Areas of applications:

- Large warehouses and warehouse outlets
- Retail stores
- Hotels and restaurants
- Office buildings
- Auto showrooms
- Private residences

# EXPANSION JOINTS TREATMENT

## WHAT IS EXPANSION JOINTS TREATMENT?

Expansion Joint Treatment refers to the process of installing a material that allows for the expansion and contraction of building materials due to temperature changes, moisture, and other environmental factors. Expansion joints are placed between building materials, such as concrete slabs, to prevent cracking and damage caused by the stress of movement.

Expansion joints are typically made of a flexible material, such as rubber or neoprene, that can withstand movement and exposure to the elements. The joint is designed to absorb the stress of the movement and prevent it from transferring to the surrounding materials, which can cause cracking and damage over time.

## Application frequency :

The frequency of expansion joint treatment depends on factors such as the amount of foot or vehicular traffic on the surface, the level of exposure to environmental factors, and the type of materials used for the treatment.

# SPORT FLOORS

## WHAT ARE SPORT FLOORS?

Ground 9 provide exceedingly competitive services. We install a wide variety of durable and multi-functional indoor sports floors. We carry out a full free site survey and our expert team are dedicated to identifying what services would be best suited to your particular needs and budget. From the specification stage to the completed installation and aftercare, our team will make sure that your project goes smoothly and efficiently. We deliver quality, safe, functional Sports floors to meet your requirements.

## AREAS OF APPLICATION :

Floor Sanding , Maintenance , Rubber Sports Floors Gym floors , Floor Refurbishment , all indoor sports specifications

SAFETY COMES  
FIRST

# SAFETY POLICY

---

Safety for all Ground 9 personnel is an essential and integral part of the company policy either on site, during mobilization and project execution. The safety policy and safe handling develops with project preparation and commences to the final project handover and demobilization from site.

## **SAFETY MEASURES:**

### **Management's Role:**

- To participate accident preventive programs.
- To provide safety officer for each site responsible for applying safety measures independently from the operation.
- To work with the client and consultant to execute the project's safety program.

### **Safety Officer's Role**

- To strictly apply the company's safety measures and policy.
- To meet safety officer requirements with the client's regulation.
- To work with the client and consultant in executing the project's safety program

### **Labor's Role:**

- To commit to safety gears, shoes, helmets, dust masks, gloves, and uniforms indicating the company name.
- To report any work hazards and cooperate with the supervisors and safety officers.

# ISO 14001:2015

## Certificate of Registration

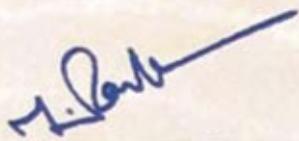

This is to Certify that
