ABOUT US

FONO is an independent music and arts venue in Ottawa, built for artists who value sound quality, intimacy, and intention. Our space is designed for musicians who want to connect deeply with listeners, whether through a stripped-down acoustic set, a full-room performance, or an experimental show.

With a 100-person capacity, a hi-fi listening lounge, and an acoustically treated performance room, **FONO isn't just a venue — it's a creative environment where artists can perform, experiment, and build community.**

Our mission is simple: to champion great music, support artists fairly, and create memorable experiences for everyone involved.

HOW WE BOOK ACTS

FONO primarily works with a trusted network of promoters who understand the FONO experience. Occasionally, we build our own bills or reach out directly to artists when we see a strong fit for the space. To submit your artist or band details to our inquiry form, [click here](#).

As a multidisciplinary venue, FONO hosts music alongside art, community gatherings, and cultural events. We are not a full-time music venue, so our programming must balance a variety of event types. That said, we are always open to connecting with new artists, exploring fresh sounds and genres, hearing from emerging bands, and supporting music communities in Ottawa and beyond.

Artists interested in performing are encouraged to [share music links, live videos, and availability](#). To see the kinds of performances we host, check out our event calendar on the [FONO website](#).

When it comes time to sort out the revenue splits and fine print, our goal is to land on an agreement that is mutually beneficial and fair for the venue and the artists alike.
