Astrid Intelligence PLC

("Astrid" or the "Company")

Score (Subnet 44) Position Increases to 3,180 TAO

Astrid Intelligence PLC (AQSE: ASTR) provides an update on its strategic position in Score (Subnet 44), operating within the Bittensor ecosystem.

On 28 November 2025, the Company deployed 1,000 TAO into an over-the-counter ("OTC") partnership transaction with Score at a 20% discount to the prevailing market price. At the time, 1,000 TAO had an approximate market value of US\$300,000.

The Company's original 1,000 TAO deployment has increased to approximately 3,180 TAO.

The increase reflects price appreciation and additional tokens earned through network participation.

Position Overview

Astrid acquired 78,740.05 alpha at an implied price of 0.0127 TAO per alpha.

As at the date of this announcement, Astrid's holdings have increased to 87,376.48 alpha. At a current alpha price of approximately 0.0364 TAO, the total position is equivalent to approximately 3,180 TAO.

Alpha tokens function similarly to shares in an individual subnet.

About Score

Score develops real-time video intelligence infrastructure. Its technology enables machine learning models to analyse and interpret live video data, initially focused on sports and expanding into broader commercial applications.

Score has announced "Manako", a vision AI platform intended to simplify computer vision deployment.

Strategic Context

Through its "Astrid Accelerator" arm, Astrid partners with and supports subnets, allowing network emissions to compound over time. The Company views these positions as long-term operational assets.

No decision has been made regarding any realisation of this position. The Board continues to assess its holdings in line with its long-term operational strategy and capital discipline.

The directors of Astrid Intelligence PLC take responsibility for this announcement.

About Astrid Intelligence PLC

Astrid is a UK-headquartered decentralised artificial intelligence company developing and operating autonomous AI systems. The Company operates a dedicated subnet within the Bittensor decentralised AI ecosystem, an open-source platform where participants contribute computing power, data and models in return for TAO emissions. Astrid's digital asset holdings are generated primarily through network participation and support the Company's ongoing operations and long-term capital resilience.
