

Unlock smarter claims fund management with advanced treasury optimisation, built on Vitesse Foundations.

Traditional claims funding strategies rely on excess reserves, fragmented oversight, and manual tracking, leading to trapped capital, reduced agility, and missed financial opportunities. As insurance operations scale, so too must the sophistication of their treasury capabilities.

The Treasury Suite introduces advanced tools for managing shared risk structures and enhancing financial operations, enabling insurers to do more with their funds, without sacrificing control or the claimant experience.

Key capabilities and benefits are:

-  **Trust account with interest returns** – Strengthen your balance sheet by recognizing Vitesse-held assets as near cash equivalents while earning interest on claim funds.
-  **Treasury Insights dashboard** – Monitor fund allocations, identify trends, and forecast claim runway with a real-time dashboard purpose-built for insurance treasury management.
-  **Subscriptions and quota share arrangements** – Segregate co-underwriters' funds while delivering a single unified claim payment, streamlining operations and preserving audit trails.
-  **Fund pooling across programs** – Centralise and simplify liquidity oversight while reducing contingency buffers across contracts or regions, boosting both operational and financial efficiency.

Benefits

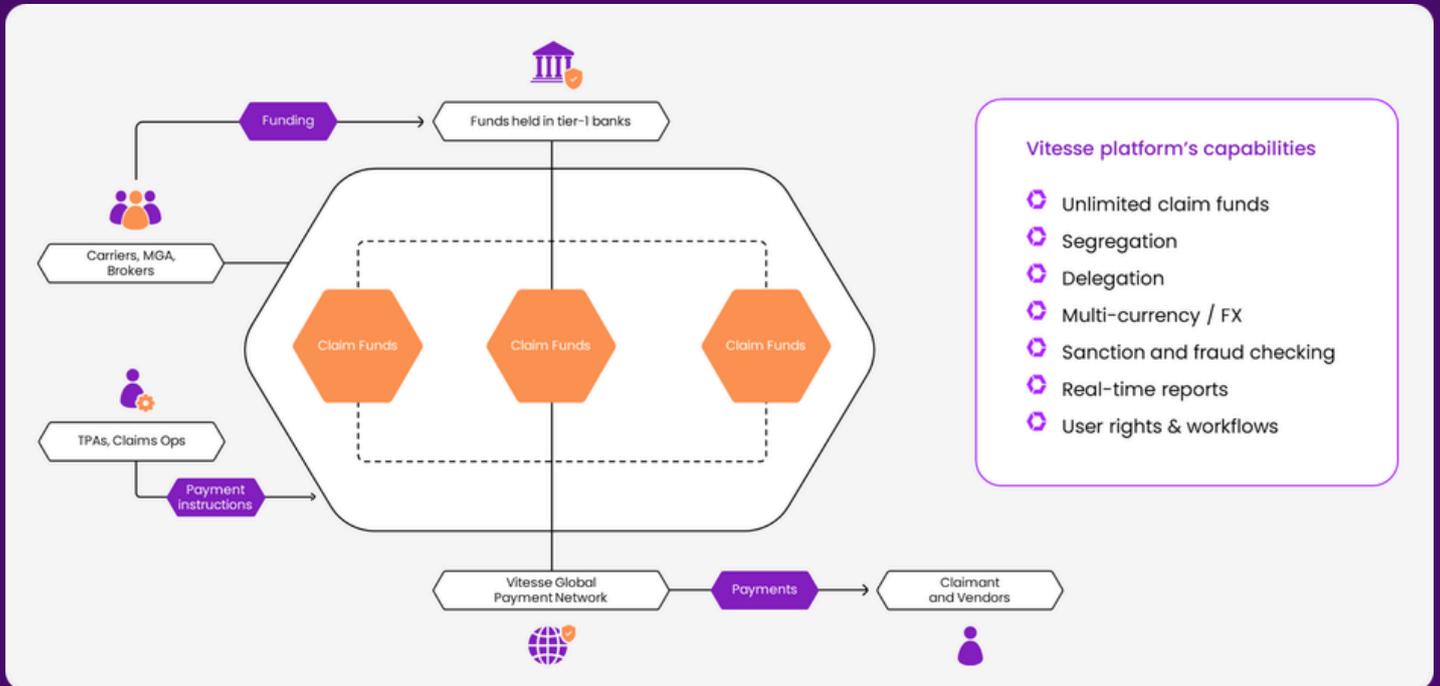

Drive financial efficiency by earning interest and minimizing idle claim fund balances.

Simplify operations with centralised fund management and automated liquidity transfers.

A future-proof financial infrastructure for Insurance

Explore the features of Vitesse Foundations and the Claims Suite

Foundations

(included in the Treasury Suite)

Loss Fund accounts

Provisioned in one business day, enabling segregation and safeguarding of funds in 25 currencies.

Global payments

Fast delivery in full value to virtually any destination, including FX and aligned with regulatory requirements.

Visibility & Reporting

Real-time access to balances and payments across the portfolio, enhancing reconciliation and governance.

Secured delegation

Granular account access controls and role-based permissions for carriers and TPAs

Claims Suite

Claimant experience

Brand your postal and electronic checks and let claimants choose how they want to get paid with Payee Choice.

Payment insights

Manage your payments more effectively with a dashboard that tracks trends, allocations and runway forecasts.

Payment operations

Queue payments until funds are available and streamline payments to panel suppliers with Merchant Pay.
