

Financial Infrastructure for Insurance

# The new Vitesse Platform

Everything you need to manage your treasury operations and delegated business, in one place.

As insurance operations become more connected and complex, organisations need more than transaction processing. They need visibility, insight, and control.

The new Vitesse platform brings that visibility, insight, and control together in a modern experience, combining intuitive dashboards, guided workflows, and self service capabilities that help users make better decisions, faster.

It includes the following features:

-  **Treasury Insights Dashboard** – Access real-time KPIs and visual summaries of account balances, payments and funding trends. Stay informed and make data-driven decisions.
-  **Account Health** – Monitor account balances and funding requirements in one place. Identify potential shortfalls early to keep payments flowing without interruption.
-  **Bulk Funding Instructions** – Ensure accurate fund allocation and record detailed reconciliation data when you or brokers send a payments across your Vitesse accounts.
-  **User Management** – Create and manage users, assign roles, and control access from a central location. Keep your organisation secure while simplifying administration.
-  **Partner Management** – View carriers, brokers, TPAs, coverholders, and other partners in a single network view. Understand relationships and quickly navigate to the accounts they manage.
-  **Smooth Migration Path** – Continue accessing your existing workflows on MAS while you transition to the new platform at your own pace. No disruption to live operations.
