

Countfeeder

Slug forming for high-speed packaging

The concept

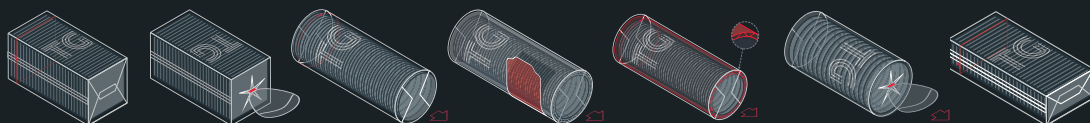

The Countfeeder bundles products on edge in the desired quantities and seamlessly feeds them into the flight bar of a CM60 or CM90 X-Fold machine. This standard version offers a cost-effective solution for pack forming and is primarily suited for non-coated products.

Flexible formats and configuration

The machine offers high flexibility in pack formats and configurations. The standard version handles up to 20 products per bundle, adjustable to lower channels. Depending on pack requirements, smaller configurations are available with 10 lanes or 15 lanes and wider version versions with 25 lanes.

Upgrades and options

A wide range of upgrades is available, including extended infeed belts, rework units, metal-detectable plastics and many more. Additional hygienic options such as extra smooth surface finishes and enhanced treatments of all product-contact parts further improve cleanability and overall performance.

Countfeeder

Flavor

The concept

The Countfeeder Flavor is the high-care version of the standard countfeeder solution. It bundles products on-edge in the desired quantity's and seamlessly feeds them into the flightbar of a CM60 or CM90 X-Fold machine. This version excels in hygiene and cleanability which makes it very suitable for flavor coated products.

Hygienic operation

Designed with hygiene in mind, all product-contact parts can be easily removed for thorough cleaning and quick flavor changeovers. Removable parts can be placed on a trolley for cleaning in a dedicated area. The washdown infeed belt supports high-pressure cleaning, while the Countfeeder on rails ensures easy access. This makes the machine a unique and ideal solution for flavored products.

Vision system

Equipped with an advanced vision system, the Countfeeder continuously monitors product flow and automatically adjusts machine settings for optimal performance. Integrated blockage detection ensures reliability, while external light compensation maintains consistent operation under varying lighting conditions.

Flexible formats and configurations

The machine offers high flexibility in pack formats and configurations. The standard version handles up to 20 products per bundle, adjustable to lower channels. Depending on pack requirements, smaller configurations are available with 15 lanes or wider version versions with 25 lanes.
