

OFW3000

New generation high-end on-edge flow wrapper

The concept

The OFW3000 is a flexible horizontal on-edge flow wrapping solution designed for high-performance food applications. By transporting products on-edge, it ensures stable positioning and controlled handling, making it ideal for loose or delicate products. This results in reduced product damage, consistent pack quality and high-speed operation. Its open and hygienic design ensures easy cleaning and excellent accessibility.

Controlled product handling

A precisely synchronized infeed system, adapted to the product dimensions and characteristics, ensures stable and controlled handling. Adjustable guides and timed conveyor movements provide reliable product transfer into the film, even at high production speeds.

Robust and reliable construction

Built on a solid aluminium and stainless-steel cantilever frame, the OFW3000 ensures long-term durability and stable operation. Servo-driven movements provide high accuracy, repeatability and reduced maintenance, contributing to overall machine reliability and performance.

Easy and intuitive operation

The machine is operated via an intuitive full-colour touch panel, offering clear control and continuous feedback. Visual alarms and messages enable fast troubleshooting and minimal downtime.

OFW3000

Dimensions	Min (mm)	Max (mm)
Product range		
Product length	40	490
Product width	12	200
Product height	6	110
Filmreel		
Max. reel diameter	350	
Max. reel weight	40	
Max. reel width	500	
Capacity		
Max. capacity	95 p.p.m.	
Max. film reel	50m/min	
Supply		
Power supply	3x400V+N+E	
Control circuit	24VDC	
Air supply	min. 6 bar	
General		
Working Height	+850	

* Specifications may differ depending on application

Disclaimer: Not all dimension combinations are possible
