

PerfoTec Pallet Cover

Engineered to Control Moisture.
Designed to Protect Profit.

PerfoBreath Pallet Cover, engineered for rapid water vapour release. It manages moisture at pallet level to keep produce and packaging stable across the supply chain. Combined with produce-adapted laser perforation, it brings together practicality and peak freshness.

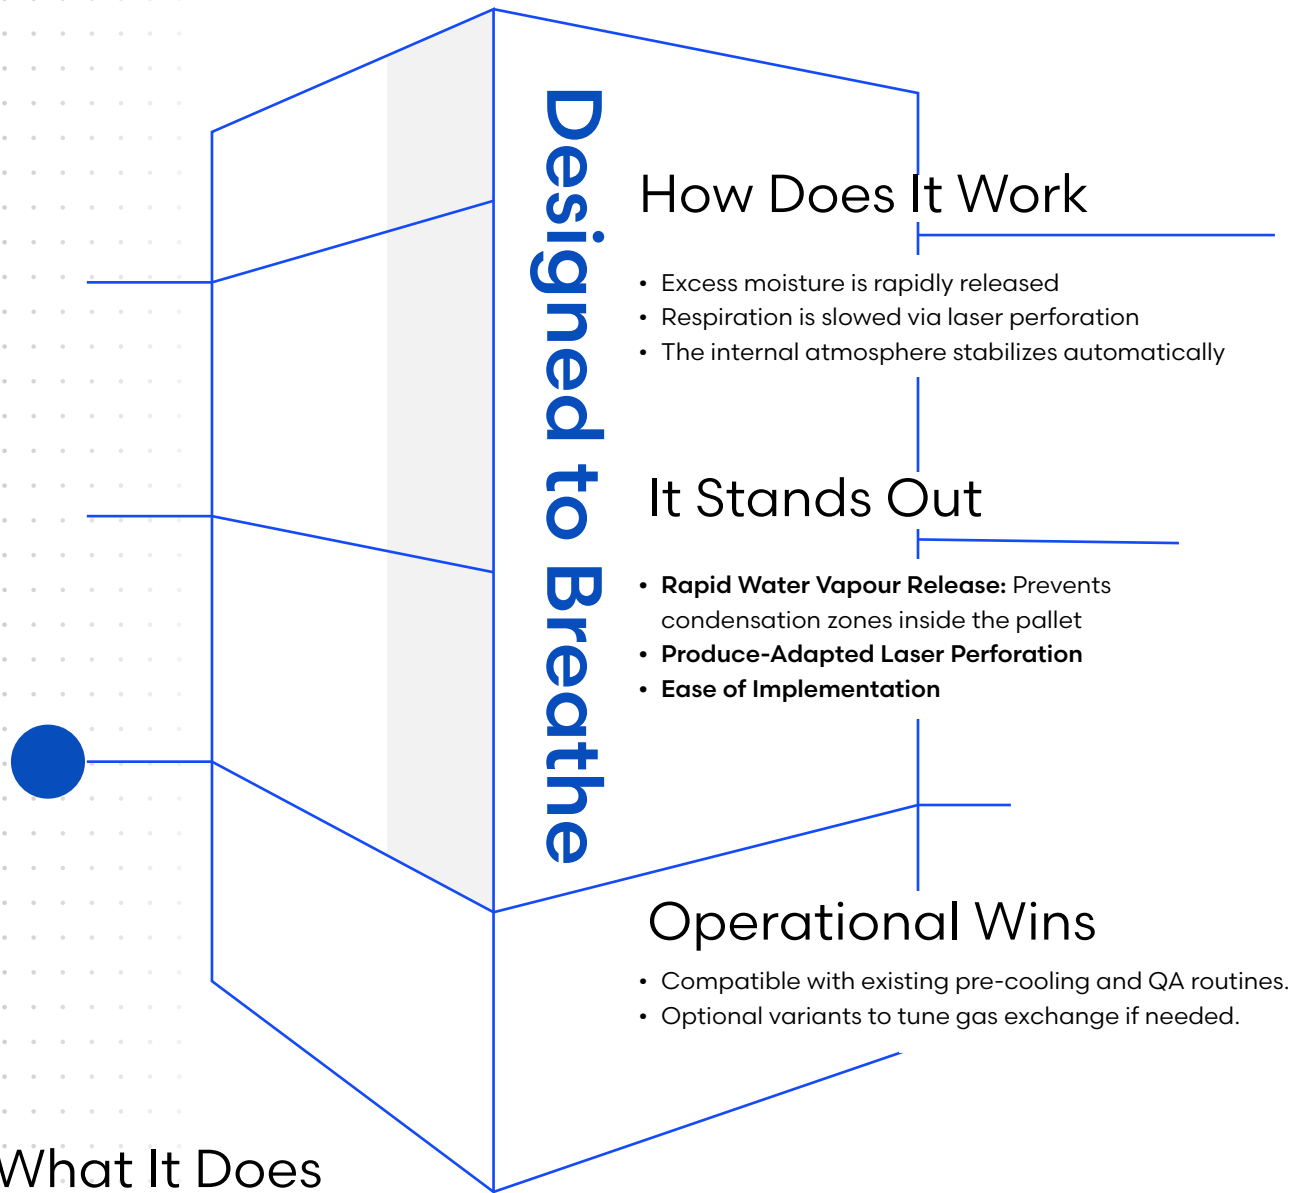

Powered by PerfoTec MAP Expertise

When combined with PerfoTec's produce-adapted laser perforation technology, each packaging format receives the exact number of perforations needed to safeguard quality.

- ▼ Respiration rate measured
- ▼ Data-driven perforation
- ▼ Controlled gas exchange
- ▶ Moisture management at pallet level

Stronger Arrivals, Fewer Claims

What It Does

- Limits surface condensation and drip
- Helps maintain firmness, colour, and net weight
- Reduces microbial decay risk
- Stabilizes pallet microclimate during long transit

Where It Delivers Value

- Long-range export routes
- Sea freight & intercontinental shipments
- Temperature-unstable routes
- Moisture-sensitive crops (berries, brassicas, leafy greens, herbs)

PerfoBreath Pallet Cover Tech Specs

Layflat Width: 2350 mm (±2%)
 Width: 1300 mm (±2%)
 Gusset: 525 mm (±2%)
 Length: 3000 mm (±2%)
 Thickness: 40 µm (±10%)
 Maximum Pallet Height: 2.5 m
 Packed Volume: 3000 L
 Material: Co-Polyester
 Melting Temperature: 185°C
 Shore D Hardness: 56
 Tensile Modulus: 120 MPa
 Food Contact Approved: EU 10/2011
