SA All Share Index vs US S&P 500 (both in Dollars)

Index 1 January 2025 = 100

President Trump approval rating (poll of polls)

Chart of the week: **SA long-term unemployment now up at 78% of total unemployment**

- The total number of people unemployment in South Africa (excluding potential job seekers / discouraged workers) reached a record high of 8.481 million in Q2 2026 according to Stats SA.
- The number of people unemployed has increase by 114 000 over the past year, which pushed SA's unemployment rate to a 4-year high of 33.6% in Q2 2026. If potential job seekers (mostly discouraged workers) are included then the unemployment rate jumps to 43.8%.
- A breakdown of the latest unemployment data in SA reveals that 77.9% of people have been unemployed for more than a year, which is referred to as “long-term unemployment”. This is up from around 70% prior to the outbreak of COVID-19.
- SA's extremely high level of long-term unemployment indicates that South Africa's high rate of unemployment has become structural and will be difficult to adequately resolve without a meaningful and sustained increased in fixed investment activity – most especially the urgent renewal of SA's economic infrastructure.
