MITIGA

Empower SecOps with Mitiga Helios AI

Automate SecOps TDIR operations. Slash triage and response times. Free your human analysts from time-consuming, tedious tasks.

INTRODUCING

Mitiga Helios AI
The Future of Cloud Security Operations

A culmination of our AI-native approach to cloud security, Mitiga Helios AI is an automated SOC analyst built upon the core capabilities of our unrivaled Cloud Detection and Response (CDR) platform:

✅

✅

✅

Cloud Security Data Lake
for full-fidelity context across clouds, SaaS, and identities

Advanced AI Engines
for real-time analysis to identify even the most elusive threats

End-to-End Automation
to enable work at scale and eliminate the most repetitive tasks

Real Results. Real ROI.

Mitiga Helios AI delivers better operational efficiency, helps security teams optimize resources, and enables the fastest Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR) possible.

Automated Triage
Automatically correlates and decodes the full sequence of an attack
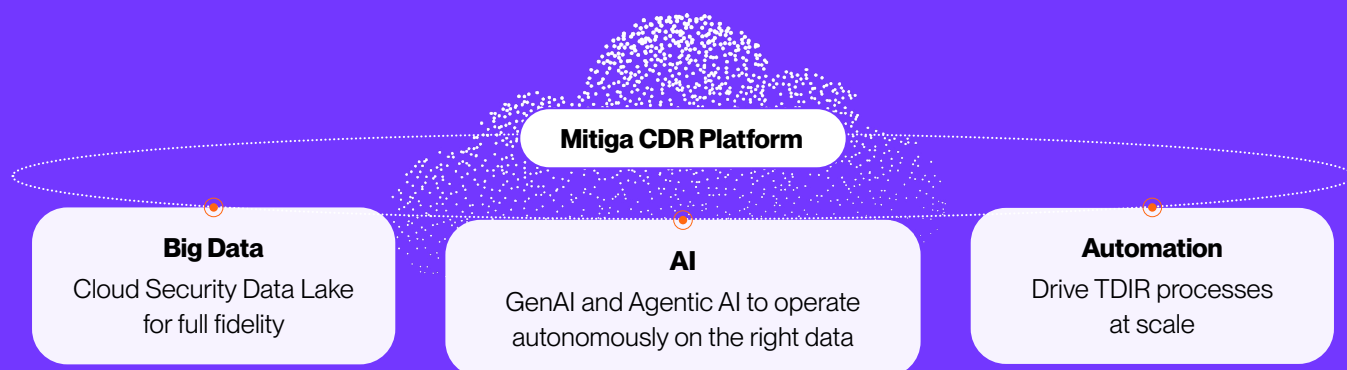

Augmented Investigation
Handles repetitive tasks and runs SecOps validations & playbooks

Enhanced Remediation
Provides remediation suggestions to empower SOC teams to focus on key decisions

Full fidelity context, less noise, accelerated triage, and dramatically improved cloud threat detection and Incident response.

Mitiga CDR Platform

Big Data
Cloud Security Data Lake for full fidelity

AI
GenAI and Agentic AI to operate autonomously on the right data

Automation
Drive TDIR processes at scale

INTRODUCING

AI Insights

Our First Helios AI Automated SoC Assistant to Lighten The Analyst Load

AI Insights—powered by Helios AI—mimics real-world analysts and cuts through the noise with augmented alerts, automated severity adjustments, and accelerated triage for rapid decision-making and response.

Mitiga's AI Insights is all about equipping your team to make faster, smarter decisions when every second counts.
90% faster triage time

67% decrease in false positives

70x faster time to close out alerts

mitiga.io

How We Do It

Unlike many plug-in AI features that are AI for the sake of AI, our Helios AI assistant is built on a foundation of cloud-native architecture and high-fidelity forensics data.
That means deeper insights, fewer blind spots, and faster response effectiveness.

Research Intelligence

Trained on billions of cloud events—and the mimicking of real-world analyst behavior—to detect subtle patterns and emerging attack vectors.

Real-Time Runtime Analysis

Every suspicious event is automatically triaged with complete context and confidence scoring—leaving you with nothing but actionable insight.

Automated Validation & Tuning

Optimizes detection logic before alerts reach your team—resulting in fewer false positives and missed threats.

Humans At The Helm

Triage decisions can be approved, modified, or rejected—assuring that your SOC team stays in command.

About Mitiga

Mitiga is the industry's most complete solution for SaaS and Cloud Detection and Response (CDR): built by investigators, for investigators. We deliver the modern capabilities that enterprises have been missing, equipping SOC teams with panoramic visibility across clouds, identities, and SaaS, automation that speeds investigations, and rich context that informs cloud threat detection, hunting, and incident response. With Mitiga's platform, security teams can zero in on modern threats at cloud speed and scale, uncovering what other solutions miss, to minimize impact and maximize resiliency. For more information, visit www.mitiga.io.
