mitiga

stop attackers in their tracks with

Zero-Impact Breach Prevention

No one can prevent attacks.
But we can prevent their impact.

Mitiga's AI-native Zero-Impact Breach Prevention Platform replaces the false promise of "zero breaches" with the power of zero impact—where attackers get in, but they leave empty handed.

What makes Mitiga different

Panoramic Awareness
One connected view across Cloud, SaaS, AI, and Identity—always on, always enriched with context.

AI-Powered Attack Decoding
Rebuilds the full attack timeline, showing what happened, what it means, and what comes next.

Attack Containment
Stops attacks mid-flight—autonomously or manually—preventing damage to ensure there's no impact.

Mitiga's Zero-Impact Breach Mitigation platform gives a full view of your ecosystem.

The outcome

Mitiga takes **Cyber Resilience** from idea to reality.
So the question isn't, "did an attack happen?" but "did it matter?"
