

EUDR Compliance Statement

UK Label Converting Ltd (T/A UK Labels)

Under European Union Deforestation Regulations (EUDR), UK labels are classified a “small” downstream operator within the EUDR chain of custody, as defined in *accounting Directive 2013/34EU, Article (3) 1.2*.

UK Labels as a manufacturer / converter of paper based adhesive label products fully intend to meet our obligations as required by EUDR, which are,

- Collecting and retaining information regarding product purchased or sold for 5 years, inclusive of the relevant DDS (Due Diligence Statement) references for each batch of product supplied by upstream operators. This DDS reference will be available on request to our customers or if required any auditing authorities.
- Notifying our customers and the relevant authorities if we discover a product which may not be compliant with EUDR.

Currently our product materials are sourced within the EU, with the above compliance appropriate to goods exported to EU member states plus Northern Ireland from December 30th, 2026.

The UK Government intend to introduce EUDR regulations under an amendment to the Environment act (2021). For goods sold within the UK, planned implementation date 2027 (TBC).

Should our status within EUDR regulations change, UK Labels remain committed to compliance and will issue a new statement as appropriate.

Signed

Andy Stokes
