

LOWLINE LOUNGER

LOWLINE LOUNGER DESIGN

The Low Line Street Lounger is based on our Highline lounge with a low seat pocket ergonomic groove. Calling out to people passing by to take a seat, lean back and stay a while in the 'hood.

LOWLINE LOUNGER PRODUCT

The Low Line Lounger is a laid-back addition to any landscape. The low seat line groove creates a natural ergonomic pocket, ensuring maximum chill for those seeking relaxation in urban settings. Versatile and adaptable, the Low Line Lounger is designed to work seamlessly in both multi-piece linear arrangements or as a striking solo feature. Its modern aesthetic makes it a statement piece for plazas, public spaces, or any destination aiming to offer an inviting place to unwind.
