

STREET FLOOR

[parklet]

STREET FLOOR DESIGN

Urban environments thrive on versatility and adaptability. The more we allow our streets and public spaces to evolve, the more they reflect the rich, diverse tapestry of urban life. City Blocks understands this intrinsic principle, which is why we've introduced a pioneering product: Street Flooring.

Cities are living organisms, constantly in flux. Street Flooring by City Blocks nurtures this vitality, providing a foundation for urban spaces to breathe, adapt, and flourish. The resilient materials ensure durability, standing up to urban life's daily wear and tear while maintaining aesthetic appeal. Its design promotes.

STREET FLOOR PRODUCT

Street flooring is available in two sizes 6' x 6' and 3' x 6' block modules, which seamlessly integrate and serve as the foundation of our "Super Blocks", adaptable to any street environment. Use Street Flooring with our Pocket Blocks to create your very own custom Super Block.

HOOP FENCE

[parklet]

HOOP FENCE DESIGN

Urban streets are the lifeblood of our cities, where the energy and dynamism of everyday life unfold. At City Blocks, we believe that creating safer, more inviting streets is key to fostering vibrant, resilient communities. Designed as an additional piece for our street flooring and assisting in creating the base for Super Blocks, our hoop fence creates a delineated pedestrian area inside our adaptive parklets.

HOOP FENCE PRODUCT

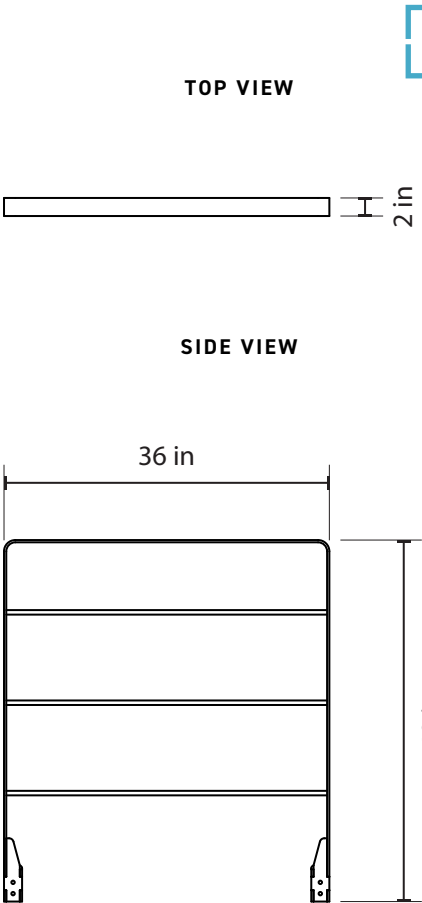

In our quest to create safer streets, the Hoop Fence is an invaluable tool. Its robust construction provides a strong, reliable barrier that protects pedestrians from traffic, ensuring that our streets remain safe for all users.

SUPER BLOCKS 30' PARKLET

SUPER BLOCKS BASE DESIGN

Adaptive streets, also known as flexible or responsive streets, are a concept in urban design and transportation planning that prioritize the adaptability and responsiveness of streets to accommodate different modes of transportation, changing needs, and evolving urban environments.

Super Blocks takes this design philosophy and embodies its ethos of multifunctionality, our adaptive parklets are designed as a modular platform for streets. They may be configured and reconfigured in many variations and formats which allow for various uses, seasonal and temporary installations or as spaces that serve a variety of purposes in the community and street they are installed in.

SUPER BLOCKS BASE PRODUCT

Adaptive parklets prioritize the creation of vibrant and inviting public spaces that encourage social interaction and community engagement. Our street floors integrate seamlessly with each other and modular additions for fencing, in any length from 12' to 30'+.

- 30' LONG - 5 6'X6' STREET FLOORS, 14 3' HOOP FENCES
