

# HIGHLINE CHAIR

## HIGHLINE MODULAR SERIES DESIGN

The High Line was originally constructed in the 1930s to elevate freight trains above Manhattan's streets, reducing accidents at rail crossings. However, it fell into disuse in the 1980s after the decline of the manufacturing industry. Instead of demolishing it, a community-led initiative worked to preserve and repurpose the structure as a public park.

Today, The High Line has become a symbol of success for neighborhood revitalization, spurring economic development and attracting new businesses and residents to the surrounding area.

In the spirit of The Highline and the beautiful wide plank seating found along the iconic park, City Blocks has designed a modular seating series that echoes the loungers, benches and seats you'll find peppered along The Highline.

## HIGHLINE MODULAR SERIES PRODUCT

Our Highline series is a modular lounger and bench system, creating both beautiful solo pieces and pieces that connect for bench and lounger modular variations. The sleek lines and durable material transforms any ordinary street space into the opportunity to create a sense of place. Embrace the concept of urban relaxation with the Highline Street Lounger Series.
