Clarity in Chaos

In a world of accelerating complexity, timely and accurate decisions define success on the battlefield. The Vegvisir product family transforms raw data into actionable insight—whether you're inside an armored vehicle, commanding from a remote outpost, or orchestrating a mission across domains. By unifying mixed-reality interfaces with live sensor feeds, Vegvisir empowers crews, operators, and commanders to see more, understand faster, and decide smarter.

**360° SITUATIONAL
AWARENESS**

**MULTI-USER
COLLABORATION**

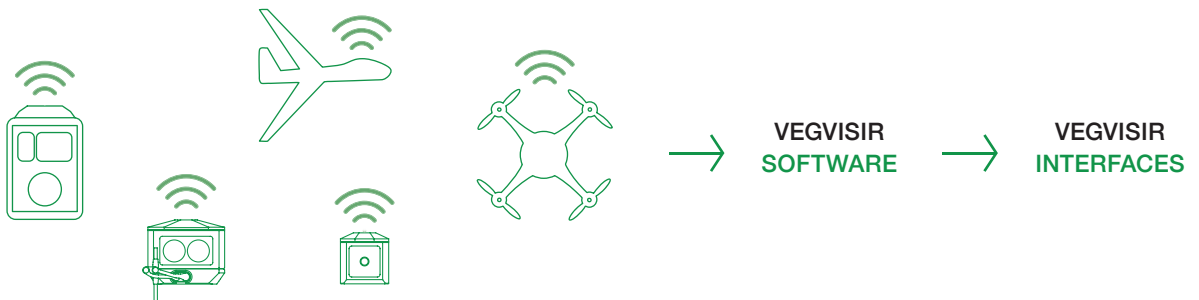

**AI-READY
INTERFACE**

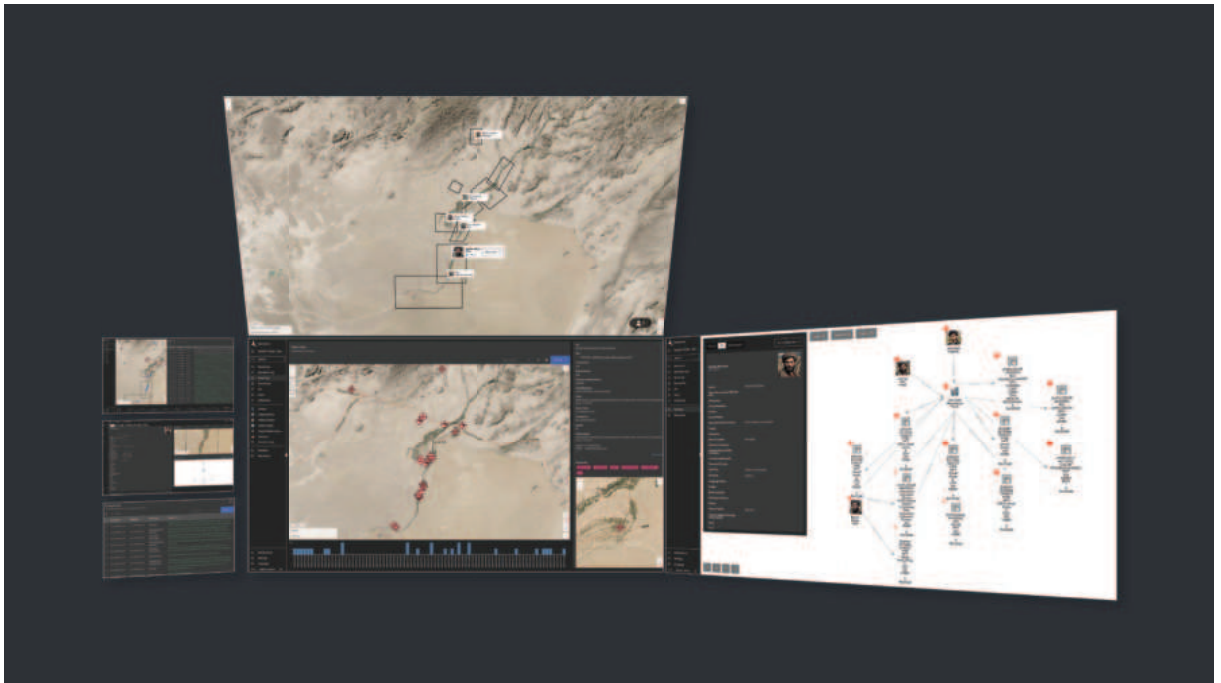

ONE DIGITAL HUB

Vegvisir integrates cameras, sensors, and networks into a unified interface — delivering the right data to the right user, instantly. By serving as the central digital hub, Vegvisir enables seamless collaboration across crews, vehicles, and command posts, ensuring a shared operational picture in real time.

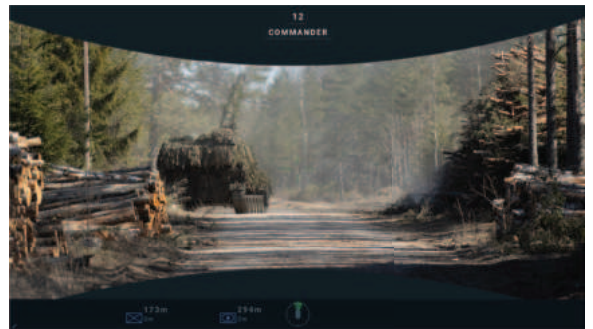

COMMAND AND CONTROL INTERFACE

DRIVER INTERFACE

COMMANDER INTERFACE

VEGVISIR VISIOR

VEGVISIR MISSION GRIP

Vegvisir ergonomic, ruggedized gear that keeps operators focused — no matter the mission or conditions.

**LIGHTWEIGHT, DURABLE,
FIELD-TESTED**

**ERGONOMIC FOR LONG
MISSIONS**

**INTUITIVE UNDER
PRESSURE**

Bridging the gap from manned to unmanned operations.

VEGVISIR

MISSION SOLUTIONS

Vegvisir Mission Solutions connect crews, remote operators, and autonomous platforms through one unified ecosystem. With **CORE**, **REMOTE**, and **NANO**, users benefit from the Vegvisir intuitive interface across manned, optionally manned, and unmanned systems — ensuring a low learning curve and seamless adaptability.

**FLEXIBLE MODULAR
DESIGN**

**ROLE AND FUNCTION
BASED UI**

**MISSION-PROVEN
RELIABILITY**

CORE

Full mixed-reality situational awareness for manned platforms. Delivers 360° vision and data overlays to crews, enhancing safety and decision speed in any vehicle.

REMOTE

Optionally manned and unmanned operations with a unified interface. Ensures seamless transition between crewed and remote control, reducing training time and complexity. Ensures seamless transition between crewed and remote control, reducing training time and complexity.

NANO

Lightweight, cost-efficient solution for unmanned systems. Extends Vegvisir capabilities to compact platforms, providing affordable yet effective situational awareness.

VEGVISIR

COMMAND AND CONTROL SOLUTIONS

VEGVISIR VIRTUAL COMMAND STATION provides commanders with a mobile, low-signature digital hub for superior decision-making. Unlimited virtual displays replace bulky hardware, integrating UAV feeds, sensors, and battlefield networks into one customizable environment. Designed for rapid deployment in vehicles or forward positions, C2 Solutions ensure continuous command and control across the battlespace. Beyond command and control, **VEGVISIR VIRTUAL COMMAND STATION** can also serve as a fleet management tool — linking platforms and assets across domains into a unified operational picture.

**UNLIMITED VIRTUAL
DISPLAYS**

**MULTI-USER
COLLABORATION**

**MOBILE &
LOW-SIGNATURE**

From tactical control to operational command — anywhere.
