

FSIS Meat, Poultry, and Egg Product Inspection Directory

Legend for Establishment Numbers

And Directory Search Guidance

Overview

These data provide additional demographic information about establishments regulated by the Food Safety and Inspection Service (FSIS), an agency of the U.S. Department of Agriculture (USDA). Additional slaughter and processing data are also available in the FSIS Meat, Poultry, and Egg Inspection (MPI) Supplement. The Meat, Poultry and Egg Product Inspection Directory is a listing of establishments that produce meat, poultry, and/or egg products regulated by FSIS and locations where FSIS provides other inspection services. The MPI is currently available in both file and App formats, and links to the Apps can be found on the FSIS website (<http://www.fsis.usda.gov/mpidirectory>).

Each row in this dataset represents one FSIS regulated establishment. The MPI information reflects establishments in an Active status at the time the data are pulled.

FSIS will continue to provide the MPI Directory file in a PDF format but will now post the machine readable MPI Directory and MPI Supplement files in an open, non-proprietary csv consistent with requirements set by the [Foundations for Evidence-Based Policymaking Act of 2018](#). Additional information can be found on the [FSIS Laboratory Sampling Data web page](#).

All variable names will be in snake_case, which is a naming convention in which all letters are written in lowercase and all spaces are replaced with underscores. This format helps with the readability of variable names and is one of the most popular naming conventions in computing and various programming languages.

Data Dictionary of MPI Directory

- *establishment_id*
 - Definition: A unique identifier that is used to identify an establishment across data tables in the FSIS databases
 - This data can be combined with other FSIS datasets using the *establishment_id* variable. Please note that other FSIS datasets may represent this variable as *EstablishmentID* with capital letters and no underscores.
- *establishment_number*
 - Definition: A letter/number combination uniquely identifying each establishment.
 - Note: Can be used to merge data from different datasets. Please note that other FSIS datasets may represent this variable as *EstablishmentNumber* with capital letters and no underscores.

- Each establishment is assigned a number for each FSIS grant of inspection that is currently active or that may have been active in the past. Each number is preceded by a variable prefix to indicate the type of grant.
 - M = Meat
 - P = Poultry
 - I = Imports
 - G = Eggs
 - V = Voluntary
- Some establishment numbers also have a suffix letter. These letters indicate different establishments.
- Establishments with multiple numbers have multiple grants of inspection. When this happens, the different numbers are joined with a '+'.
 - Examples
 - *M1234* – The prefix 'M' indicates that the establishment has a meat grant or had a meat grant in the past. The '1234' is the numerical portion that goes with the meat grant.
 - *P1234* – The prefix 'P' indicates that the establishment has a poultry grant or had a poultry grant in the past. The '1234' is the numerical portion that goes with the poultry grant.
 - Note: If an establishment has more than one grant, the numerical portions may be the same, but that is not required
 - If establishment *M234* has/had a poultry grant as well, the poultry number might be *P234*, but it could be a different number
 - If *M234* has/had a poultry number that is different than *P234*, (e.g. *M234+P567*), then *P234* is available and could be the number of a different establishment
 - *M1234A* and *M1234B* would be different establishments because they have different suffixes
 - Establishment numbers are found on package labels
- *establishment_name*
 - Definition: The name of an establishment on the FSIS grant of inspection
- *street*
 - Definition: The street of the physical address of the establishment
- *city*
 - Definition: The city of the physical address of the establishment
- *state*
 - Definition: The state of the physical address of the establishment

- *zip*
 - Definition: The zip code or postal code of the physical address of the establishment
- *phone*
 - Definition: The main phone number of the establishment
- *duns_number*
 - Definition: The Data Universal Numbering System (DUNS) number is a unique nine-digit identification number provided by Dun & Bradstreet (D&B). This number is not required and must be applied for, so not every establishment may have one. More information about the DUNS number can be found here: [All About the D-U-N-S Number - Dun & Bradstreet \(dnb.com\)](https://www.dnb.com/duns-number.html)
- *district*
 - Definition: The FSIS district where an establishment is located
 - See <https://www.fsis.usda.gov/contactus/fsis-offices/office-field-operations-fo> for more information about FSIS districts
- *circuit*
 - Definition: The FSIS circuit where an establishment is located
 - The first two numbers of the circuit number are the district number
 - Circuit numbers with a four-digit integer indicate an establishment that is under FSIS jurisdiction
 - Circuit numbers with two integers followed by two letters indicate that an establishment is under Talmage-Aiken (TA) jurisdiction. TA establishments are federal establishments that are inspected by state inspectors in states with a TA program.
- *size*
 - Definition: The size of the establishment based on the business class
 - The options are Large, Small, and Very Small
 - Large establishments are defined as establishments with 500 or more employees
 - Small establishments are defined as establishments with 10 or more employees but fewer than 500 employees
 - Very Small establishments are defined as establishments with fewer than 10 employees or annual sales of less than \$2.5 million
 - Note: This variable does not correlate highly with production volume
- *county*
 - Definition: The county of the establishment
- *fips_code*
 - Definition: The county-level Federal Information Processing System (FIPS) Code of the establishment. FIPS codes are numbers which uniquely identify geographical areas. County-level FIPS codes have five digits: the first two are the FIPS code of the state

to which the county belongs, and the last three are the FIPS code of the county itself. Please refer to the United States Census Bureau for more information: [ANSI and FIPS Codes \(census.gov\)](https://www.census.gov/ansi/)

- *latitude*
 - Definition: The latitude value of the establishment
- *longitude*
 - Definition: The longitude value of the establishment
- *grant_date*
 - Definition: The grant date of the most recent Grant of Inspection (GOI) of the establishment
- *activities*
 - Definition: The type of inspection activities the establishment is approved for under its grant of inspection
 - Please note that this field is reflective of an establishment's current state. In the supplementary MPI information, the slaughter and processing fields both include a 360-day lookback. It is possible that an establishment, for example, does not have the activity of "Meat Slaughter" in its list of current activities, but the supplementary MPI information may show a record of meat slaughter within the past 360 days.
 - For this directory, the types of identified operations are:
 - Slaughter
