# CONTOUR TOUCH

For professionals dealing with shoulder pain, Contour Touch brings navigation back to center, so you point, click and scroll without reaching to the side.

Its smooth glass surface lets you tap or click anywhere, while shortcut buttons give precise control.

Add the full-size wrist rest, and you've got a comfortable, pain-relieving setup for long workdays.

## Lifecycle assessment results

At Contour Design, we are committed to sustainability and continuously monitor our products through comprehensive Life Cycle Assessment (LCA) reports.

These assessments provide full transparency regarding each product's carbon footprint. From sourcing raw materials to recycling them at the end of their life.

Our LCA study complies with the reporting guidelines of ISO 14067:2018 and is independently reviewed in accordance with ISO 14067-3 and ISO 14066, which outline competence requirements and GHG validation procedures.

The scope of the study covers two years of usage in Copenhagen, Denmark, aligning with the standard warranty period.

As with other industry studies, the results have a degree of uncertainty since they are based on Ecolnvent datasets; however, we plan to incorporate direct supply chain data over time to enhance the transparency and accuracy of our findings.

# CONTOUR TOUCH WIRED

### Made with recycled materials

The product is made from 42% recycled materials by weight.

### Smarter chemistry

The product chemistry ensures compliance with REACH and RoHS.

### Products designed to last

The product's lifespan can be extended with a replaceable battery, giving the Contour Touch Wired a second life.

### Contour Touch is:

PVC-free, Arsenic-free, Mercury-free, Beryllium-free, and Brominated flame retardants-free.

## Carbon footprint of the Contour Touch Wired

By lifecycle stage

By material

# CONTOUR TOUCH WIRELESS

### Made with recycled materials

The product is made from 38% recycled materials by weight.

### Smarter chemistry

The product chemistry ensures compliance with REACH and RoHS.

### Products designed to last

The product's lifespan can be extended with a replaceable battery, giving the Contour Touch Wireless a second life.

### Contour Touch is:

PVC-free, Arsenic-free, Mercury-free, Beryllium-free, and Brominated flame retardants-free.
