

# THE SECURE EMERGENCY CHANNEL

FOR  
YOUR  
BUSINESS

The growing demands on **emergency management** and **secure communication** call for reliable solutions—especially in times of crisis. With **DSB Rescue**, we offer you an **independent emergency channel** to ensure maximum operational flexibility.

Now available with **emergency notifications** and **clear escalation logic**

## Emergency Management

DSB Rescue enables rapid and structured notification of all relevant personnel in an emergency, with predefined procedures and clear lines of responsibility.

## Dual-Channel Principle

Notifications are sent simultaneously via two separate channels: management and employees are reached at the same time—even if internal systems fail.

## Independence

DSB Rescue runs as an external instance decoupled from your own network. This ensures communication remains guaranteed at all times, even during IT outages or cyberattacks.

## Structure & Security

Contacts, roles, and procedures are defined in advance and automatically applied in an emergency. Sensitive content is made available to authorized personnel.

Two-way communication

Independent of your own IT system

Rapid alerting

Hierarchical contact management

Encrypted delivery

Access without login for employees

Full logging

GDPR-compliant

LANTECH Informationstechnik GmbH

# OVERVIEW OF FEATURES

## Management Access

Secure access to confidential information: Executives can access emergency documents, status reports, and specific instructions through a secure, password-protected portal.

## Employee Information

Quick updates for all employees via a public portal that doesn't require a login. Content can be customized by department or location.

## Contact Management

Manage all relevant contacts in a centralized and structured manner. Notification sequences and escalation levels are clearly defined and can be adjusted at any time.

## Documents

Important documents, such as emergency plans or work instructions, are provided in encrypted form and are immediately available in an emergency.

## Automation

The notification process is largely automated. The amount of manual work required in the event of a crisis is kept to a minimum.

## Security

All accesses and notifications are fully logged. Data transmission is consistently encrypted and GDPR-compliant.

## Availability

DSB Rescue is available at all times – regardless of internal systems, locations, or devices.

## Integration

As part of the DocSecBox, DSB Rescue can be seamlessly integrated into existing systems or used flexibly as a stand-alone solution.
