DocSecBox
for Defense

SECURE
INFORMATION.

MISSION READY.

In defense and security, sensitive information must reach the right people – securely, reliably and under full control. **DocSecBox for Defense** provides a secure platform for exchanging confidential documents and mission-critical information between armed forces, government agencies, defense companies and trusted partners.

SECURE. CONTROLLED.
SOVEREIGN.
MISSION READY.

Securing information for
a safer tomorrow.

DOC SEC BOX
DSGVO KONFORM

Whether operational documents, technical documentation, maintenance data, logistics information or sensitive project files: DocSecBox keeps your data within an infrastructure you control.

Your data. Your infrastructure. Your control.

With **Server-Based Encryption,** data is encrypted directly on your server – under your control – or in a data center you trust.

Combined with **Two-Factor Authentication (2FA),** fine-grained access permissions and comprehensive audit trails, DocSecBox provides a controlled environment for sensitive information throughout its entire lifecycle.

Securely integrated into your existing environment

The **internal DocSecBox API** enables secure integration with your existing systems and workflows. Documents and information can be exchanged between internal applications without relying on a public REST API.

Built for critical environments

Sovereign Deployment
Maintain control over infrastructure, data, access and operations.

Two-Factor Authentication (2FA)
Add an additional layer of protection for users and partners.

Internal API Integration
Connect DocSecBox securely to your internal systems and processes.

Complete Traceability
Maintain a comprehensive audit trail of who accessed what, when and from where.

Server-Based Encryption & Self-Hosted
Keep sensitive data within your own infrastructure or a trusted data center.

Fine-Grained Access Control
Define exactly who can access, receive and manage information.

From **command and planning to land, air and naval forces, maintenance, logistics, R&D and international cooperation,** DocSecBox enables sensitive information to be shared securely across organizational boundaries.

SECURE. CONTROLLED.
SOVEREIGN.
MISSION READY.

Securing information for a safer tomorrow.
