Brain
INDEPENDENT INTELLIGENCE

YOUR **OWN LOCAL** AI!

THINKS ALONG.

TELLS NO SECRETS.

ARTIFICIAL INTELLIGENCE THAT KNOWS YOUR BUSINESS AND KEEPS IT TO ITSELF.

LT Brain is your AI assistant on its own dedicated hardware. It answers questions in seconds using the knowledge in your **manuals, documents** and **software.** It runs on-site at your premises or securely hosted in the LANTECH data center, set up and continuously supported by LANTECH.

LANTECH.EU/LT-BRAIN

Your data stays with **you**

Writes and **creates files**

Employees see what they‘re **allowed to**

LT Brain

INDEPENDENT INTELLIGENCE

Your data stays your data

No public cloud AI, no data sharing, no training of third-party models.

Predictable costs

Buy the hardware once, sign a service contract. No fee per query.

Company knowledge in seconds

Answers from your documents, manuals and software.

Full-service support

Consulting, setup, integration, onboarding, maintenance and updates.

Your employees are already using AI, often with private accounts. Whatever gets copied into third-party input fields leaves your company: customer data, cost calculations, contracts. LT Brain is the controlled alternative.

Your data. Instantly available. Secure.

Two options, one principle:

1. **Your own hardware.** The AI server is located on your premises, and the AI runs entirely within your network.
2. **In the LANTECH data center,** your hardware is operated securely by us, with no space or technical infrastructure required on your end.

LT Brain is not an off-the-shelf software subscription. We deliver the hardware, set it up, **connect your software** and train your team. After that, we take care of **maintenance, updates and support** on an ongoing basis, with dedicated contact persons.

Works with your software

From the ticketing system and ERP to the organizational handbook: LT Brain accesses your systems and makes **company knowledge available** to everyone. Your employees work via a simple chat interface in the browser, with no installation required.

Built for businesses that carry responsibility

For **SMEs, tax advisors** and **law firms, industry** and **manufacturing,** all the way to **NIS2 and critical infrastructure (KRITIS) organizations:** LT Brain helps wherever AI should make everyday work easier, but sensitive data doesn't belong in third-party clouds. And best of all: **you set the rules and stay fully independent.** Feel free to schedule a presentation.
