MILAN SEA KIT

MILAN 2.0 SEA - The industry's standard rescue device is now also approved worldwide for passenger evacuation at sea. SKYLOTEC is the only manufacturer that can offer a complete set for sea rescue. The tried-and-tested MILAN 2.0 SEA abseiling device (Art. No. A-027-SEA) is supplied with other components required for sea rescue.

Kit components:

- 1x MILAN ROPE (10 to 30 m max.)
- 1x SEAL PAC DRYBAG (water-proof transport bag)
- 2x RESC B (rescue triangles for abseiling persons)
- 1x LOOP 35 kN (Sling)
- 1x OVALOY TRI (Aluminium TriLock-Carabiner)
- 1x Quick Start Manual

Note: When working at heights, a suitable rescue concept based on a risk assessment is essential. MILAN offers a variety of uses for different rescue scenarios. To master these techniques, careful training of the users is required by a SKYLOTEC certified instructor who is specially trained in the equipment.
