ANCHOR CABLE 8MM

The ANCHOR CABLE steel cable is ideal for setting up heavy-duty anchor points around structural elements and in the strand. It is made of galvanised steel cable (8mm) and is cut and abrasion resistant. A transparent protective plastic cover protects against wear during use. Connecting elements according to EN 362 can be attached through the end eyelets. The test load is 22.2 kN.

- cut and abrasion resistant
- with transparent protective cover made of wear-resistant plastic
