VELOCIOUS

BY AVAALI

Redefining Sourcing, Procurement
and Supplier Experience.

Velocious: Simplifying Procurement, Empowering Performance

Over 70% of procurement digital transformations fail due to complexity.

Velocious helps enterprises simplify sourcing, automate compliance, and streamline supplier collaboration — enabling procurement teams to move faster, stay compliant, and drive measurable business value.

Procurement Transformation Shouldn't Be This Hard.

Procurement today is more connected, yet more complex than ever. Disparate systems, manual interventions, and fragmented supplier relationships slow down execution and increase compliance risk.

Inefficient Manual Processes

Reliance on spreadsheets and emails increases cycle times and operational costs.

Fragmented Supplier Networks

Siloed systems prevent unified supplier visibility and consistent performance tracking.

Compliance Risks & Data Silos

Inconsistent tax adherence and lack of audit trails expose enterprises to regulatory penalties.

Low Supplier Adoption

Complex interfaces discourage participation, affecting supplier collaboration and satisfaction.

The Future Belongs to Simplifiers.

Procurement is evolving from transactional to strategic — but most digital initiatives struggle due to complexity and poor adoption.

67%

of procurement leaders are investing in automation to improve speed and accuracy (Gartner, 2025).

45%

of enterprises struggle with fragmented supplier data, affecting decision-making and compliance (Gartner).

40%

report increased compliance challenges and regulatory scrutiny (IDC).

25%

more supply chain disruptions occur when communication gaps persist between suppliers and enterprises (Forrester).

PROCUREMENT MADE SIMPLE, INTELLIGENT, AND EFFORTLESS.

Velocious is built to make procurement transformation seamless — not stressful.

It replaces fragmented tools with one intelligent ecosystem that connects enterprises and suppliers across sourcing, contracting, payments, and analytics.

By combining simplicity with automation, Velocious enables teams to focus on strategy, not systems. Every transaction becomes faster, every process becomes auditable, and every supplier relationship becomes stronger.

SIMPLIFY PROCUREMENT. EMPOWER PERFORMANCE.

An Intelligent Platform for E-Sourcing, Procure-to-Pay, and Supplier Experience Automation.

Velocious unifies sourcing, contracting, onboarding, invoicing, and analytics in one platform.

Designed for global scalability and local compliance, it enables enterprises to achieve higher adoption rates, reduce operational costs, and accelerate digital ROI.

VELOCIOUS

Built for Simplicity.
Designed for Scale.

Four Pillars of Velocious:

01

Ease of Adoption

Intuitive UI for both enterprises and suppliers ensures 10x faster onboarding and minimal training.

02

Compliance by Design

Automated validation against tax and regulatory frameworks reduces risk and audit effort.

03

Faster ROI

Proven 70% faster implementation cycle vs. global suites, ensuring quicker time-to-value.

04

ERP-Agnostic

Seamless integration with All Major ERPs.

End-to-End Procurement Made Effortless.
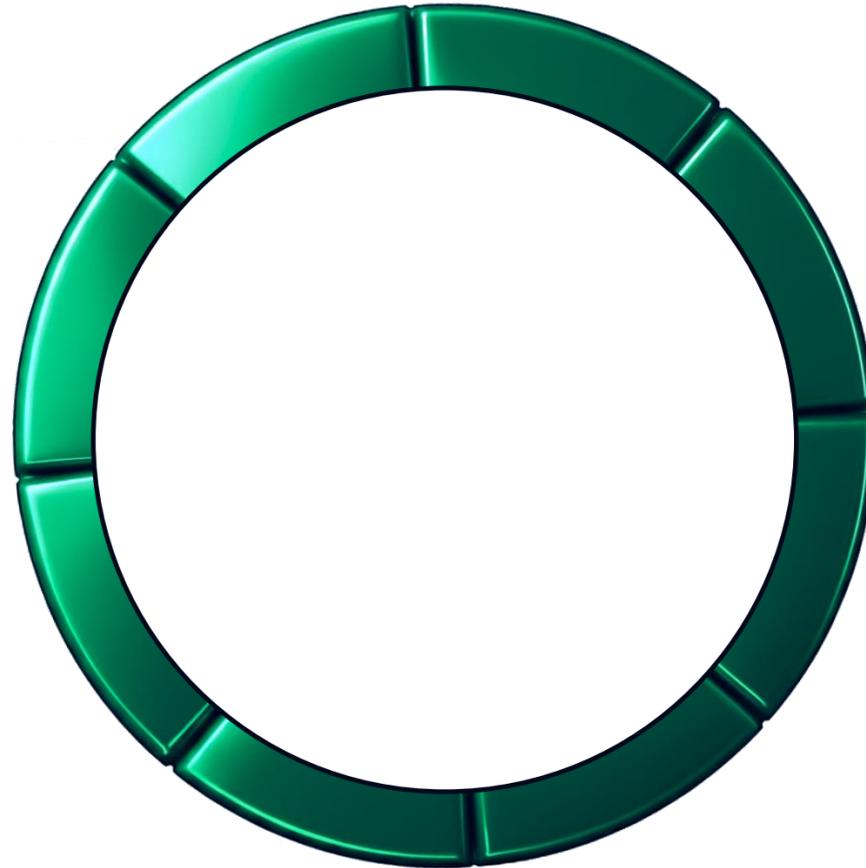

01

E-Sourcing

Conduct RFQs, RFPs, and reverse auctions with configurable rule engines, multi-level approvals, and proactive notifications.

07

Spend Analytics

Real-time insights by supplier, category, and plant — helping businesses control spend and uncover savings.

02

Contract Management

Author, review, and renew contracts effortlessly with e-signatures, audit trails, and template-driven governance.

06

Accounts Payable Automation

OCR-driven invoice capture, validation, and 2/3-way match for faster processing and payment visibility.

03

Catalogue Management

Enable self-service buying through hosted catalogues, product uploads, search filters, and real-time price visibility.

05

Supplier Experience

Central supplier dashboard for PO visibility, invoice tracking, query management, and digital signature validation.

04

Supplier Onboarding

Digital onboarding forms, workflow approvals, and auto vendor creation ensure rapid supplier enablement.

Streamline Procurement with Confidence.

Simplified Procurement

Intuitive workflows eliminate manual bottlenecks and improve visibility across every stage.

Automated Compliance

Enforces regional tax and audit norms automatically, reducing risk and delays.

10x Faster Onboarding

Supplier onboarding and enablement through guided forms and validations.

ERP-Agnostic Platform

Works across multiple ERP systems, ensuring centralized control.

Rapid Go-Live

Modular setup accelerates implementation timelines by 70%.

GBS Process Automation

Empowers shared service teams through self-service dashboards and query automation.

Global Supplier Access

One platform for local and international suppliers with language and tax adaptability.

Cost-Efficient Operations Operations

Automation across S2P cycle delivers measurable savings and improved supplier trust.

E-Sourcing

Smarter Sourcing, Faster Decisions.

- Configurable rule engine for
- weighted bid evaluation.
- PR & Non-PR based RFQ creation.
- Manual or Excel-based bulk RFQ upload.
- Float RFQs to existing or new/unregistered suppliers.

- Quote comparison with scoring models.
- Multi-level review and approval workflow.
- Quote revisions with proactive alerts and notifications.
- Integrated RFQ Analytics for insights.

Reverse Auctions

Real-time competitive bidding with transparency and fairness.

Contract Management

Control Every Contract, Effortlessly.

- Template-based contract authoring and version control.
- Configurable approval workflows with digital signatures.
- Automated alerts for renewals and expirations.

- Built-in audit trail and clause library.
- Integration with ERP for payment and compliance validation.
- Secure storage for global access.

Catalogue Management

Empower Users with Self-Service Buying.

- Hosted catalogues for both enterprise and supplier items.
- Product upload with validation and bulk update options.
- Advanced search and category filtering.

- Add-to-cart, requisition, and approval workflow.
- Real-time price visibility with discount structures.
- Seamless ERP sync for inventory and pricing updates.

Supplier Onboarding

Onboard Suppliers in Days, Not Weeks.

- Comprehensive onboarding forms with validations.
- Multi-level approval workflows.
- Built-in query management and proactive notifications.

- Auto-vendor creation and updates in ERP.
- Real-time supplier data and compliance checks.
- Centralized repository for certificates and documents.

Supplier Experience

Transparent, Collaborative, Real-Time.

- Real-time PO visibility and acknowledgment.
- Automated ASN (Advanced Shipment Notice) creation.
- Invoice upload and tracking with digital signature verification.

- Query management system for dispute resolution.
- Notifications and reminders for pending actions.
- Dashboards for supplier performance and communication logs.

Invoice Management

URN	Invoice No.	Invoice Date	Vendor	Vendor Type	Doc Type	Total Amount	Uploaded On	Status

Accounts Payable & Spend Analytics

Automated AP. Intelligent Insights.

Spend Analytics Features

- Spend by category, supplier, plant, and time period.
- Supplier performance dashboards.
- Trend analysis and predictive spend intelligence.

Accounts Payable Features

- AI/ML-based OCR for invoice capture.
- Multi-channel ingestion (portal, email, drive).
- Digital signature verification for e-invoices.

- Duplication and currency checks.
- 2-way/3-way match validation.
- Local tax compliance and QR code reading.

>70%

Agile deployment framework drastically reduces time-to-go-live.

85%

supplier adoption within 3 months: Intuitive interface drives rapid participation.

$2.5B+

spend managed: Demonstrating global capability, resilience, and performance.

Proven at Scale.

Velocious is trusted by large enterprises and public sector organizations to digitize procurement at scale.

ADDITIONAL OUTCOMES:

50–70%

cycle-time reduction.

30%

Cost savings via automation.

Increased supplier satisfaction through transparency.

Real Results.
Real Impact.

Aditya Birla Renewables

Intelligent Automation

- Automated vendor onboarding and compliance validation.
- Real-time invoice processing integrated with SAP.
- Scalable architecture supporting enterprise growth.

"Velocious has fundamentally elevated our procurement capabilities."

– Prem Kiran, Aditya Birla Renewables

Oil India Limited

Supplier Collaboration & Control

- Enhanced satisfaction across 14,000+ suppliers.
- Unified supplier visibility and payment tracking.
- Improved compliance and cycle time efficiency.

Trusted by Industry Leaders

Powering procurement transformation across energy, manufacturing, retail, and public sector.

Recognized by the Best. Trusted by Leaders.

Gartner

Gartner Recognition:

Featured in Gartner Market Guide for Sourcing Applications 2025

ISO 27001

ISO 27001 Certified:

Global data security compliance.
