

Token Ban List

Unauthorized account sharing and service misuse erode revenue and dilute the value proposition for paying customers. To avoid misuse in the era of expanding CDN strategies, multi-CDN token ban list solutions are required.

Drive Subscriber Growth by Ensuring Fair Use

Harper's Token Ban List solution is an edge service that decentralizes token revocation and tracking processes to function across CDNs. It enables real-time awareness of compromised or already-in-use tokens worldwide while maintaining optimal user experience. Built to handle billions of tokens, Harper's Token Ban List service ensures fair use while contributing to subscriber growth.
