Bachelor of Science in Computer Science, 2010-2014

Technical Skills Swift, SwiftUI, UIKit, Objective-C, React Native,
Kotlin Multiplatform, Jetpack Compose, Git

Projects Involved

[Dwell Student Living](#)

Student Accommodation Management Application

Role: Lead Mobile Engineer, KMM Engineer, iOS Engineer

Responsibilities: Lead a team of mobile app engineers for the development of the app for a client.
Learned and used KMM as the tech. Assigned in several modules such as dormitory maintenance request, parcel status management and user account management.

[HomerAI](#)

Smart Property Tool

Role: Lead Mobile Engineer, React Native Engineer, iOS Engineer

Responsibilities: Lead a team of mobile app engineers to develop the in house flagship product.
React Native was used to develop this project. Worked on displaying valuation graphs, allowing users to book consultation with real estate agents and services. As a lead I was also tasked to monitor monthly active users and report revenue conversion rates.

[Ohmyhome](#)

One Stop Shop Property Application

Role: iOS Engineer

Responsibilities: Worked as an iOS Engineer for the former flagship product of the company.
The product was built using native iOS. I was assigned features such as displaying a collection of new real estate properties, allowing users to book consultation with real estate agents, and maintenance of some older modules.

[MyElite.pro](#)

Platform Client Management Tool

Role: React Native Engineer, iOS Engineer

Responsibilities: Involved in the development of a client management app that goes hand in hand with a web platform. React Native was used to build the product and I was assigned to client management features and accessing user contacts to sync with the app.

[Cora](#)

Home Owners' Property Management Platform

Role: iOS Engineer

Responsibilities: Assigned to the development of a product that bridges home owners and property managers. Native iOS was used to build the app. Mostly worked on the whole iOS app singlehandedly from modules such as home feed, maintenance requests, feedback posting and more.
