

RE-VE-NEER

DESIGNED BY
STUDIO
JEROEN
WAND

BRING CHARACTER
AND SUSTAINABILITY
INTO EVERY SPACE

THE SURFACE OF RE-veneER

By layering and pressing various types of reclaimed veneer, we create rich textures and unique patterns that make every piece truly original.

Whether you're looking for seamless walls with integrated shelving, flowing curves, or built-in cabinetry, our process offers creative freedom and a sustainable edge.

STUDIO JEROEN WAND

Re-veneer is designed and produced by Studio Jeroen Wand, a design studio based in Eindhoven, the Netherlands. We create interiors, furniture, and custom pieces for private clients, businesses, and industry partners.

With Re-veneer, you work exclusively with our studio—from concept to installation. We handle every step of the process to ensure a seamless experience and the highest quality result.

Because we develop both the design and production methods in-house, we have full control and flexibility. This means we can tailor each project to your specific needs and vision.

Every piece of Re-veneer is crafted in our studio using solar power—making your project not only unique, but sustainably made from start to finish.

PERFECT
FOR

FEATURE WALLS

INTERIOR INSTALLATIONS

CUSTOM FURNITURE

COLORS AND WOODTYPES

We have a large variety of left-over veneer in stock. The options below are just a small selection of the many different possibilities.

Warm Brown

Black walnut + types of darker and lighter wood around the black walnut like: Wengé, Ebony, Teak etc.

Fresh and Light

Ash + types of darker and lighter wood around Ash like: Maple, Oak, Zebrano etc.

Mid tones

Oak + types of darker and lighter wood around Oak like: Ash, Walnut, Cedar etc.

SPECS

Walls

Re-veneer on a base panel like MDF, Chipboard or Plywood.

Height: standard up to 3000mm.

Over 3000mm is possible, but challenging.

Length: Endless with a seamless installation by Studio Jeroen Wand.

Curves: minimum radius is 200 mm

We can integrate various elements into the wall, such as for shelving, desks, cabinets, power outlets, and more

Objects

We can build object completely from Re-veneer layer-by-layer, supported by solid wood frames. Or Re-veneer can applied on a base panel.

Size: Maximum size of any surface is 3000x1200 mm

Protective coatings on Re-Veneer are always tuned to wishes of the client and application needs.

Glue

Emicode EC1 - very low emission

Meets BREEAM version 2014v1 requirements
HEA9 Volatile Organic Compounds

Meets requirements LEED version 4 EQ credit
Low-Emitting Materials

Contributes to WELL objectives in category:
Air and Materials
