

EUROPE'S SOVEREIGN CLOUD STORAGE

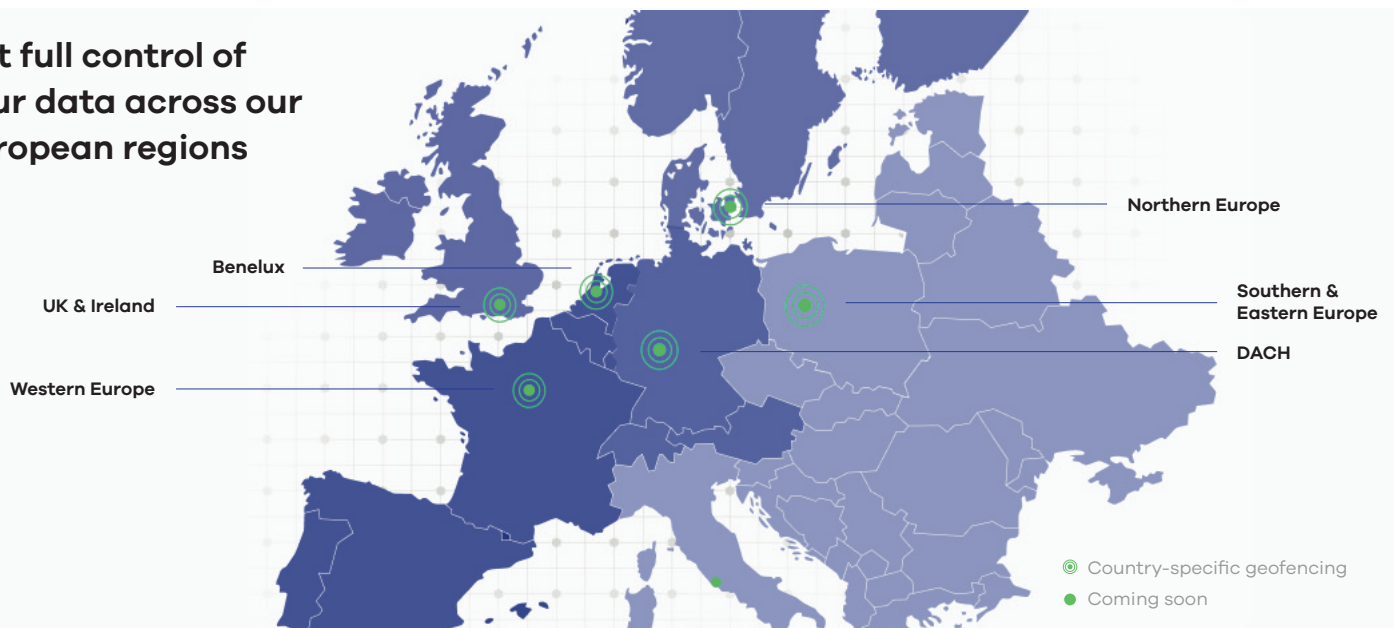

Secure, compliant, and S3-compatible object storage with unmatched value and performance.

Why Impossible Cloud stands out

Impossible Cloud is one of the leading providers of S3-compatible object storage in Europe. More than 3,000 enterprises use our GDPR-compliant storage solution to back up, archive, and manage their data. The data is stored in certified data centers and subject to the highest security standards. The fully S3-compatible API enables fast migration without vendor lock-in and can be integrated into existing systems with just a single line of code.

Impossible Cloud is built on high-performance infrastructure that ensures high availability, strong performance, and effortless scalability. The platform is suited for a wide range of use cases such as backup, disaster recovery, tape-to-cloud, and ransomware protection. Our solution delivers digital sovereignty, full data control, ease of use, and long-term technological readiness.

Use cases

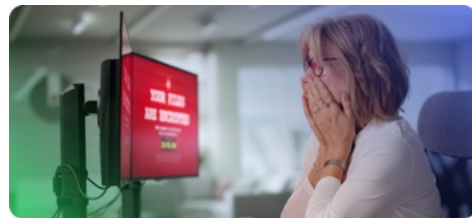

Backup

Reliable backup and fast recovery

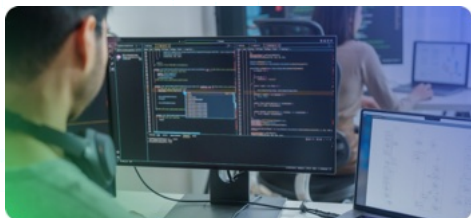

Archiving

Secure, compliant, and cost-effective archiving

Ransomware protection

Protect your critical business data from cyberattacks

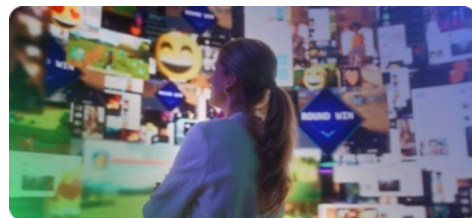

Applications

Power next-gen applications with flexible object storage

AI and IoT data

Build a future-proof data lake for AI and IoT

Media and surveillance

Scalable storage for media files and surveillance data

Seamlessly integrated with leading tools including

Acronis

veeam

NAKIVO

MSP360

"Object storage should be powerful and compliant with predictable pricing. We built Impossible Cloud so that businesses can move faster without hidden trade-offs, offering performance without lock-in and sovereignty without complexity."
