ARTIST STATEMENT

Jeremy Morton is an Atlanta-based interdisciplinary artist and neurophysiologist whose work bridges art, science, and the human nervous system. Following a nerve injury and chronic pain requiring a spinal stimulator in 2023, he began painting as rehabilitation—transforming limitation into liberation. His multisensory practice merges painting, scent, sound, and laser engraving to evoke emotion through memory and embodiment. In 2025, he expanded into Corrina Sephora Metal Studio, completing welding and metal fabrication training to design custom brass and steel framing systems. His ongoing series, Radiant Roots and Balance Slate, explore neuro-symbolic storytelling through texture, light, and sensory interaction—uniting neuroscience, art, and recovery as parallel healing forces.

SELECT EXHIBITIONS & INSTALLATIONS

- Midtown Atlanta Banners - Peachtree Street NE at 10th and 14th Streets (on view through 2026). Featuring works from 'Radiant Roots: Atlanta's Tapestry of Light.'
- Museum of Contemporary Art of Georgia (MOCA GA) – October 2025. 'Balance Slate,' exploring neuroscience, sensory memory, and immersive signal design.

ONGOING PROFESSIONAL PRACTICE

Certified Surgical Neurophysiologist (CNIM) specializing in intraoperative neurophysiological monitoring for complex brain and spine procedures. Provides neuromonitoring services in collaboration with top surgical teams across Piedmont, Northside, Emory, Children's Healthcare of Atlanta (CHOA), and Wellstar hospital systems, as well as major regional and national centers.

Actively trains and mentors medical residents and surgical fellows in the use of intraoperative neuromonitoring (IONM), focusing on cranial and spinal mapping, nerve integrity, and advanced monitoring techniques.

His experience in pediatric and adult neurosurgery informs his artistic practice—translating the dialogue between signal, sensation, and consciousness into visual form. Through this work, he continues to define the Somatic Signal™ framework, where art and neuroscience intersect as parallel languages of empathy and awareness.

EDUCATION & TRAINING

- B.S. in Psychology, University of Missouri
- Professional Certificates in Medical Neuroscience, Medical Imaging, and Perception — Harvard, Johns Hopkins & Duke Universities
- Mindfulness-Based Stress Reduction (MBSR) Course — Completed
- Stanford YogaX Certificate in Applied Yoga & Mind-Body Science — Enrolling (2025)
- Portugal Embodied Arts Residency — 2025
- Improvisational Performance Training — Ongoing study in creative communication and adaptive presence
- Welding & Metal Fabrication, Corrina Sephora Metal Studio (2025)
