Every Saving Has a Name.
Every Name Has a Scorecard.

Connect process efficiency to individual accountability.
LSS + PMF link every operational gain to the leader who delivered it.

THE PROBLEM

The process improves. But no one owns the result.

Lean savings are reported at department level, never tied to individuals.
Performance scorecards and operational projects live in separate systems.
CEO targets are set at the top but never reach individual KPI cards.

MODULE 01 | EVOLUTION TIER

LSS

Lean Six Sigma Engine

FTE Savings Engine
Automated headcount optimization.
Exact savings per process, per team.

Auto Generated Projects
Waste identified, project created.
Tracked from diagnosis to completion.

Takt Time Calculation
Shift data in, efficiency metrics out.
No industrial engineering required.

MODULE 02 | EVOLUTION TIER

PMF

Performance Management Framework

CEO to Team Leader Cascade
Strategic targets flow down through
every hierarchy level to individual cards.

Fair Measurement Across Roles
5 calculation logics ensure every role
is measured appropriately for its function.

Strategic Target Lock
Leadership targets appear as locked
anchors on every scorecard. Non removable.

---

5 Logic
Fair measurement
across roles

CEO
Targets cascade
to every card

FTE
Savings linked
to individuals

Immutable
Full audit
trail

"*Your Lean project saved 12 FTE last quarter.*
Can you name the 3 leaders who made it happen? Is it on their card?"

LSS + PMF close the loop between savings and accountability.

See it live.   Request a 15 minute operations demo.
