

Studio Container Home

Compact. Flexible. Built for Costa Rica.

20–25 m²

Simple Living, Designed with Intention

The ArcaVida Studio Modular Home is designed for those who value simplicity, efficiency, and modern living. Purpose-built for Costa Rica's climate and lifestyle, the Studio delivers comfort and functionality in a compact, well-designed space.

Ideal for individuals, couples, guest accommodations, or short-term rentals, the Studio offers a smart entry point into eco-conscious living—without sacrificing quality or comfort.

A small home with a clear purpose and lasting value.

Ideal for:

- ✓ **Airbnb Rental**
Prime rental opportunities in Costa Rica's top destinations
- ✓ **Guest House**
Modern and comfortable retreat for visitors.
- ✓ **Personal Retreat**
Your private escape for relaxation or remote work.
- ✓ **First Eco-Home**
A sustainable start to home-ownership in Costa Rica.

Sleeps 1–2 Comfortably

Modern Bathroom

Spacious Deck Area

Minimal by design. Comfortable by nature.

Interior Experience

The Studio interior is designed to feel open, calm, and practical. Natural light, clean finishes, and an efficient layout create a space that feels larger than its footprint.

Every element is intentional—supporting daily living, remote work, or rental use while maintaining a sense of simplicity and ease.

Minimal by design. Comfortable by nature.

Smart, Compact Design

Sleeps 1–2 comfortably

Open living and sleeping area

Modern bathroom

Kitchenette-ready layout

Optional deck connection

Designed to live well—without wasted space.

Why Flat Pack Construction?

Flat pack construction allows the Studio to be transported efficiently and assembled quickly—without sacrificing strength, comfort, or durability.

-  Reduced shipping and logistics costs
-  Faster installation timeline
-  Minimal on-site disruption
-  Factory-controlled build quality

Efficient by design. Proven in execution.

Built for Costa Rica

The Studio Flat Pack DCH is engineered specifically for Costa Rica's climate and environmental conditions.

- Insulated panels for heat and humidity comfort
- Waterproof roofing system for heavy rainfall
- Wind-resistant construction
- Seismic-ready design

Built to perform—year after year.
