# eSpin – Introduction

---

eSpin Technologies, Inc. designs, develops, and manufactures nanofiber filter media rolls and converts the media into filters, wipes, and sampling smears. With over 26 years of innovation and manufacturing experience, we are committed to making high quality products that are American made and environmentally friendly. Our products have been used in diverse applications including commercial, industrial, aerospace, automotive, energy, manufacturing, healthcare, government, military, and nuclear facilities.

---

## **eSwipe®:**

Nanofiber-Based Decontamination Dry Wipe

### **Uses:**

Components and Tools, Electronic Industries, Military Equipment, Production Machines, Weapons Plants, Radiological Clinics, Nuclear Laboratories, Clean Rooms, Nuclear Power Plants, Nuclear Waste Sites

### **Eliminates:**

Loose radiological particles, beryllium, biological and organic contaminants, oils, ash, and other hazardous contaminants.

---

## **Exsens®**

Nuclear detection / Sampling Swab (i.e., smear, wipe spot pads, site survey wipes)

### **Uses:**

Site surveys, laboratory testing, and detection of nuclear contamination in laboratories, nuclear facilities, nuclear waste sites, industrial environments, and radiology clinics.

### **Collects:**

The nanofibers in swab are able to collect sample as small as 50 nanogram level from wet or dry surfaces and soil thereby increasing detection efficiency and speed.

---

## **SimwYpes®:**

Muslin (CC) and Synthetic (SY) dry decontamination wipes

### **Uses:**

Lab Equipment, Machine Surfaces, Components and Tools, Walls, Flooring, Piping, etc.

### **Eliminates:**

Loose radiological particles, beryllium, biological and organic contaminants, oils, ash, and other hazardous contaminants.

# Exceed Filters – Introduction

---

Exceed® Filters are American made with a focus on premium quality providing durability and long service life. Our Air Filters utilizes advanced high surface area nanofiber technology that allows for the both, the high sub-micron particles capture efficiency and lower energy utilization. With fast Lead Times and Reduced Life Cycle Costs we not only aim to be the best, but we also delivery the best performance.

---

## Filter Style

### Aluminum Separator:

- MERV 11-16, and HEPA
- high-performance filtration in critical and demanding applications

### Bag Pocket:

- MERV 11-14
- General HVAC systems and critical process applications

### Mini-Pleat:

- MERV 11-16, and HEPA
- High efficiency filtration low with pressure drop

### Rigid Cell:

- MERV 11-14
- High-Airflow filtration and high moisture environments

### Wireback-Pleat:

- MERV 8, 11, and 13
- High performance in commercial and industrial HVAC systems

### V-Cell:

- MERV 11-16, and HEPA
- High efficiency filtration with low pressure drop

---

### Industries Served:

Aerospace, Automotive, Clean Rooms and Hospitals, Commercial Buildings, Data Centers, Depot Maintenance, Firing range, Government Facilities, Manufacturing Plants, Military Bases, Museums, Nuclear Facilities & Plants, Poultry and Meat Processing Plant, Power Plants

### Eliminates:

Mold and spores, Bacteria and viruses, Dust, Oil Mist, Paint over spray, Salt fog/spray, Smoke and fumes

# eSwipe®

eSwipe® is a nanofiber novel dry wipe engineered for decontamination that cleans without cleaning agents/solution while also bio-compostable. Its functionalized nanofiber coating provides a high surface area that enhances the capture of loose radiological particles, beryllium, biological and organic contaminants, oils, ash, etc. from a wide range of surfaces. With a 9x better capture than conventional cleaning materials comprised of fibers significantly larger in diameter.

## Features

- Safe On Skin
- No Residue or Odor
- Bio-Compostable
- Eco-Friendly

## eSwipe

Item Number	Dimensions	Count	Description
eSwipe50	12x12	50	Decon Wipes - Bag
eSwipe100	12x12	100	Decon Wipes - Bag

# Exsens®

Exsens® is a novel dry sampling Swab (i.e., smear, wipe spot pads, site survey wipes) used to collect a variety of loose contaminants from a wide range of surfaces and air. The high surface area nanofiber has high particle collection efficiency and is able to detect at 50 nanogram level, allowing one to detect the lowest contaminant level.

## Features

- High Surface Area
- Can be Used to Monitor and Assess Radioactive Contamination
- Collects Larger Amount of Particles for More Accurate Testing
- Effective on Most Surfaces

## Exsens

Item Number	Dimensions	Count	Description
eSSW44PB050	47 mm	50	Wipe at 3% concentration
eSSW44PB100	47 mm	100	Wipe at 6% Concentration
eSSW44PB500	47 mm	500	Wipe at 9% Concentration

# SimwYpe®

SimwYpes® are a novel nuclear decontamination dry wipe made using synthetic or cotton fibrous textile fabric that has been infused with functional chemistry. SimwYpes is effective in removal of loose dust, debris, oil, and biological contaminants from work surfaces, tools, equipment, components, among other surfaces. The chemicals used in production are food grade materials.

## Features

- Food Grade Materials and Chemicals
- Nontoxic
- Eco-Friendly

## SimwYpe - Muslin CC

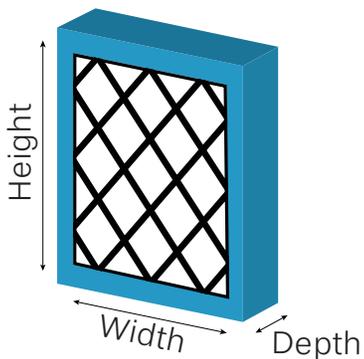

Item Number	Dimensions	Count	Description

# Aluminium Separator Series

*\*Custom Sizes Available*

Exceed's aluminum separator filters, constructed with durable galvanized steel frames, are engineered for high-performance filtration in critical and demanding applications. These filters utilize either advanced nanofiber or glass fiber media, offering superior particulate capture efficiency. The aluminum separator design ensures optimal airflow while preventing the bypass of unfiltered air, maximizing filtration performance. With a low initial pressure drop, Exceed aluminum separator filters help reduce energy consumption and lower operating costs. Ideal for use in HVAC systems, clean rooms, and other demanding operating conditions.

## Features

- Galvanized steel frame
- Single and double header options
- Available in MERV 13–16, and HEPA
- Multiple Gasket Options

# Bag/Pocket Series

*\*Custom Sizes Available*

Exceed's pocket filters, featuring advanced nanofiber media, are designed to provide superior filtration in both general HVAC systems and critical process applications. The high-performance nanofiber layer ensures exceptional capture of submicron particles, making these filters ideal as final filters in HVAC units, where clean air is essential for maintaining optimal indoor air quality. Additionally, their robust design and high surface area make them an effective pre-filter for critical process applications, protecting sensitive equipment and extending the life of downstream filters.

## Features

- Available in MERV 11-14
- Galvanized Steel Frame
- Custom Pocket Length Options

# Mini-Pleat Series

★**Custom Sizes Available**

Exceed's mini-pleat air filters are available with customizable frame options, including beverage board, plastic, and galvanized steel, to meet the specific needs of various applications. With a highly compact pleat design, these filters provide superior filtration efficiency while maintaining a low initial pressure drop, helping to reduce energy consumption and lower operational costs. Engineered for optimal performance and flexibility, Exceed minipleat filters deliver reliable, cost-effective solutions across a wide range of industries.

## Features

- Available in MERV 11-16, and HEPA
- Available in 2", 4", 6", and 12" depths
- Beverage board, Plastic, Aluminum, or Galvanized Steel Frames
- Multiple Gasket and Header Options

# Rigid Cell Series

★Custom Sizes Available

Exceed's rigid cell air filters are designed for maximum durability and performance in high-demand applications. Featuring a sturdy metal wire backing and pleat dividers, these filters maintain their shape and integrity under heavy airflow and high-pressure conditions. The advanced nanofiber media ensures superior particle capture efficiency, while the metal reinforcement provides additional structural strength, preventing pleat collapse.

# Wireback-Pleat Series

*\*Custom Sizes Available*

Exceed's pleated air filters are designed for maximum durability and superior performance. Featuring advanced nanofiber filter media, our filters deliver exceptional submicron particle capture efficiency and offer a service life up to 3 to 4 times longer than conventional pleated filters. The increased surface area of the nanofiber media, combined with a lower initial resistance, results in reduced energy consumption and significant cost savings over time. With Exceed Air Filters, you can optimize performance, extend maintenance intervals, and lower operating costs while maintaining the highest level of filtration efficiency.

# V-Cell Series

*\*Custom Sizes Available*

Exceed's V-cell air filters are designed with lightweight plastic frames, making them easy to handle and install without sacrificing durability or performance. Available with either synthetic or glass fiber media, these filters offer excellent filtration efficiency, effectively capturing both larger and submicron particles. The V-cell design maximizes surface area, providing extended service life while maintaining a low initial pressure drop to reduce energy consumption and operating costs.

## Features

- Available in MERV 11–16, and HEPA
- Plastic Frame
- Available with gasket

## V-Cell - MERV 11

Item Number	Dimensions	Description
MV1120x20x12XSSMPO4F	20x20x12	Plastic frame with a single header.
MV1124X24X12XSSMPO4F	24x24x12	Plastic frame with a single header.

## V-Cell - MERV 14

Item Number	Dimensions	Description
MV1420X20X12XSSMPO4F	20x20x12	Plastic frame with a single header.
MV1424X24X12XSSMPO4F	24x24x12	Plastic frame with a single header.

## V-Cell - MERV 15

Item Number	Dimensions	Description
MV1520X20X12XSSMPO4F	20x20x12	Plastic frame with a single header.
MV1512X24X12XSSMPO4F	12x24x12	Plastic frame with a single header.
MV1524X12X12XSSMPO4F	24x12x12	Plastic frame with a single header.
MV1524X24X12XSSMPO4F	24x24x12	Plastic frame with a single header.
