

## EXF Series Exhaust Clamp

- EXF clamps are heavy-duty exhaust clamps designed for secure connections in exhaust systems without the need for welding.
- Commonly used in automotive, diesel, and performance applications, they are ideal for joining pipes, mufflers, and catalytic converters.
- These clamps are also well-suited for heavy equipment, agricultural machinery and, commercial trucks.
- Their reusability and ease of installation make them a preferred solution for OEM builds, aftermarket upgrades, and on-the-go maintenance or repair.
