SPECIAL EDITION WITH DR. SACHIN CHHATWANI

Clinical Treatment Planning and Staging Protocols

Two-day hands-on course with Dr. Raul Arana Mora

DATES	LOCATION	INVESTMENT
27-28 February 2027	**Barcelona City Center, Spain**	**EUR 1,400 early bird (EUR 1,700 after 7 Nov)**
LEVEL	GROUP SIZE	LANGUAGE
Intermediate to advanced	**Maximum 8 participants**	**English**

About the course

This course is not just about understanding clear aligner biomechanics. It is about mastering the complete step-by-step design process so you can create precise, predictable treatment plans on your own using professional software. Instead of focusing only on movement concepts, the training teaches you how to design and execute advanced protocols inside the software, with optimal biomechanics, structured staging and efficient force application.

Special guest: Dr. Sachin Chhatwani joins on Sunday with a lecture on MOJO, OnyxCeph and aligners, from TMD treatment to orthodontics.

What you will learn

- Apply the digital center of resistance, hinge movements and attachment design to control tooth movement.
- Plan cases with a systematic approach: lower arch form first, then upper arch coordination.
- Build treatments with macro and micro staging, keyframes and synergistic vs. antagonistic movements.
- Use validated protocols for expansion, deep bite, sagittal discrepancies and open bite.
- Execute every protocol directly inside professional planning software, with fewer refinements.

Program

Saturday 27 February	
9:00 - 9:45	General considerations: hinge movements, attachments, digital center of resistance.
9:45 - 10:30	Systematic case planning approach: theory.
10:30 - 11:00	Coffee break
11:00 - 12:00	*Practice:* systematic case planning approach.
12:00 - 13:00	Staging concepts: macro and micro staging, keyframes, staging panel tools.
13:00 - 14:00	Lunch
14:00 - 15:00	*Practice:* keyframes, hinge movement, round tripping, force control.
15:00 - 15:15	Coffee break
15:15 - 16:15	Protocols for specific clinical findings: expansion, deep bite.
16:15 - 17:15	Lower arch staging, part 1.
19:00 - 21:00	Tapas and wine networking.

Sunday 28 February	
9:00 - 10:30	Special guest lecture, Dr. Sachin Chhatwani: MOJO, OnyxCeph and aligners.
10:30 - 11:00	Coffee break
11:00 - 12:00	*Practice:* lower arch staging (continuation).
12:00 - 13:00	Protocols for specific clinical findings: sagittal and open bite.
13:00 - 14:00	Lunch
14:00 - 16:00	*Practice:* staging for sagittal and open bite cases.
16:00	Q&A, closing words and material delivery.

What's included

- **Exclusive Attachments Patch Pack**: over 40 ready-to-use patches designed by Dr. Mora (bite ramps, slits, cut-outs and attachment designs), adaptable to any case.
- **Printed Clinical Guide**: a step-by-step manual covering attachments, staging strategies, arch development and planning considerations.
- **Full session recording**: access to the complete workshop recording for 6 months.
- **Hands-on practice**: guided treatment planning and staging exercises with direct feedback.
- **Coffee, snacks and lunch**: provided on both days.
- **Tapas and wine**: networking evening on Saturday after day 1.
- **Certificate**: printed certificate of attendance delivered on site.

Your instructor

Dr. Raul Arana Mora is a general dentist and implantologist with a fellowship in periodontics and a master in clear aligners. He directs PredictSmile, is an official OnyxCeph trainer, and has designed more than 5,000 aligner cases while training dental professionals in aligner software and biomechanics for over 6 years.

Who should attend

Orthodontists, dentists, lab owners and technicians who already plan aligner cases in software and want a structured, protocol-based workflow. Bring your own laptop with your planning software installed.
