

TARGET[®] Absolute Plus

Giving CGP an Edge with AI-based Insights

Advanced and metastatic cancers where multi-layered profiling enables accurate detection of actionable mutations and resistance pathways.

Powered by  Cellworks

Bringing AI-driven Global Personalised Cancer Care

IN COLLABORATION WITH U.S BASED CELLWORKS

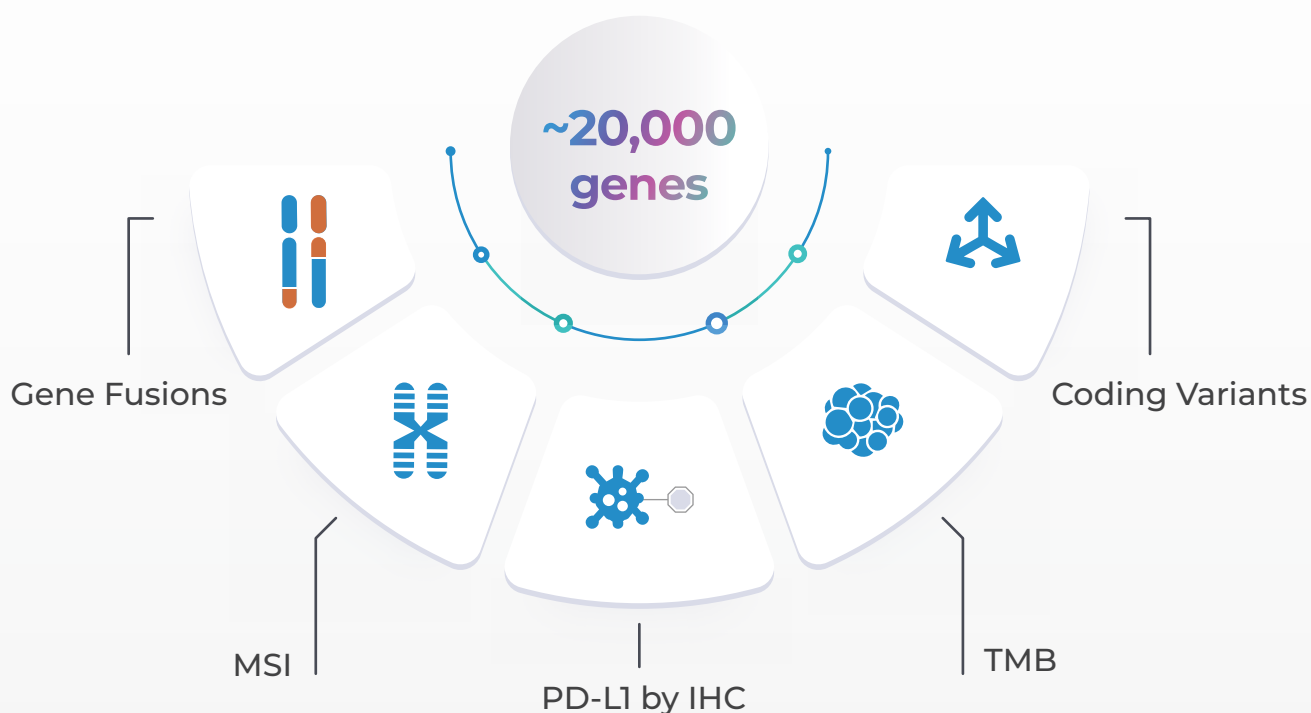

4baseCare has collaborated with U.S. Based Cellworks to bring AI-driven Personalised Cancer Care in India and other by utilising **TARGET Absolute Plus** to deliver greater insights to the oncology fraternity, predict individual patient therapy responses and enable therapy selection resulting in optimal treatment outcomes.

The comprehensive molecular insights of 4baseCare's TARGET Absolute Plus and knowing each patient's response to therapies prior will enable the personalised treatment of front-line and refractory patients and will guide oncologists in India to select the most efficient treatment strategy for each patient to improve clinical outcomes.

TARGET[®] Absolute Plus

GIVING CGP AN EDGE WITH AI-BASED INSIGHTS

TARGET Absolute Plus provides comprehensive report based on whole exome profiling to match targeted therapy with biomarkers and also uses Cellworks advanced AI based Biosimulation Platform and Computational Omics Biology Model (CBM) to predict individual patients' response to therapies using Therapy Response Index (TRI) and provides a comprehensive Cellworks Ventura report.

AI driven clinical information

Biosimulation of Therapy Response Index (TRI)

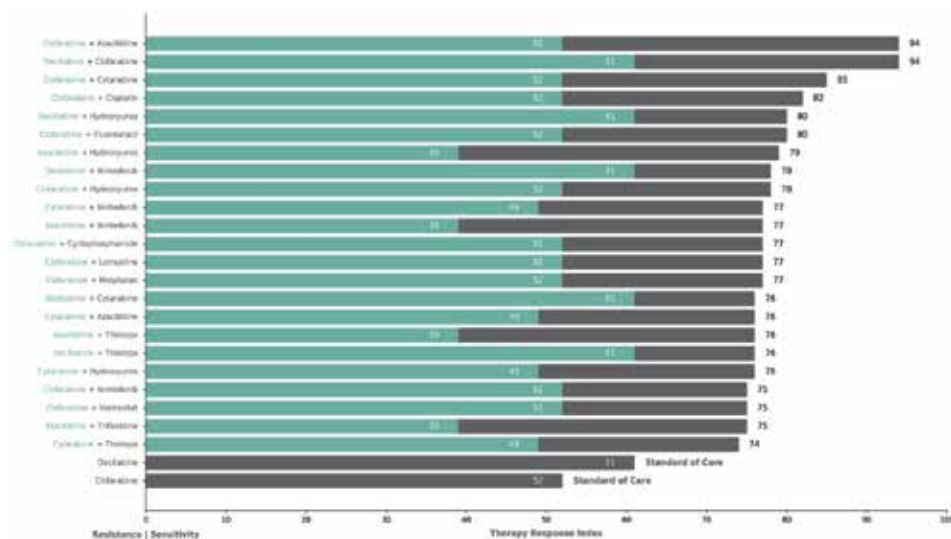

Pathway analysis

Highlights of Cellworks Ventura Report™

The Cellworks Biosimulation Platform powered by the groundbreaking Cellworks Computational Omics Biology Model (CBM) utilizes Next-Generation Sequencing (NGS) data and other patient-specific omics data, such as transcriptomics, to predict personalised patient responses to therapies. Cellworks personalised therapy predictions are ranked based on their **Therapy Response Index (TRI)** score within Cellworks Ventura reports.

Top Biosimulation Treatments

The Cellworks Ventura Personalised Medicine report lists the top 25 TRI treatments. The total score of the treatment is listed as a dark grey bar. For combination therapies, the light green section represents the strongest monotherapy component of the combination.

Benefits of Cellworks Ventura Report™

Biosimulates exhaustive combinations of drugs from Cellworks Drug Library

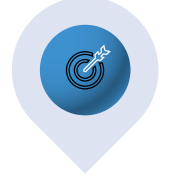

Provides therapy options
beyond Standard Care

Ranks the most efficacious therapies

Lists TRI Scores for
Standard Care drugs

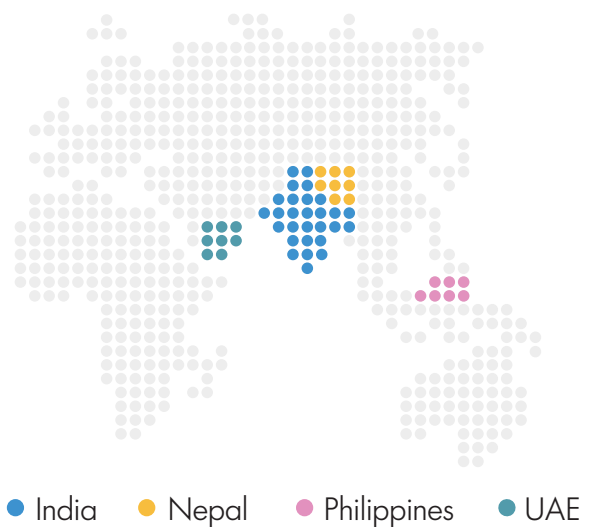

Enables efficacy comparisons between novel combinations & Standard Care

Revolutionising Care, Personalising Hope Globally

With Precision Oncology, we're not just treating cancer.
We're redefining what's possible in Cancer care.

Together, **We Beat** Cancer
