

HSE & Sustainability
services

COMPANY PROFILE

2025

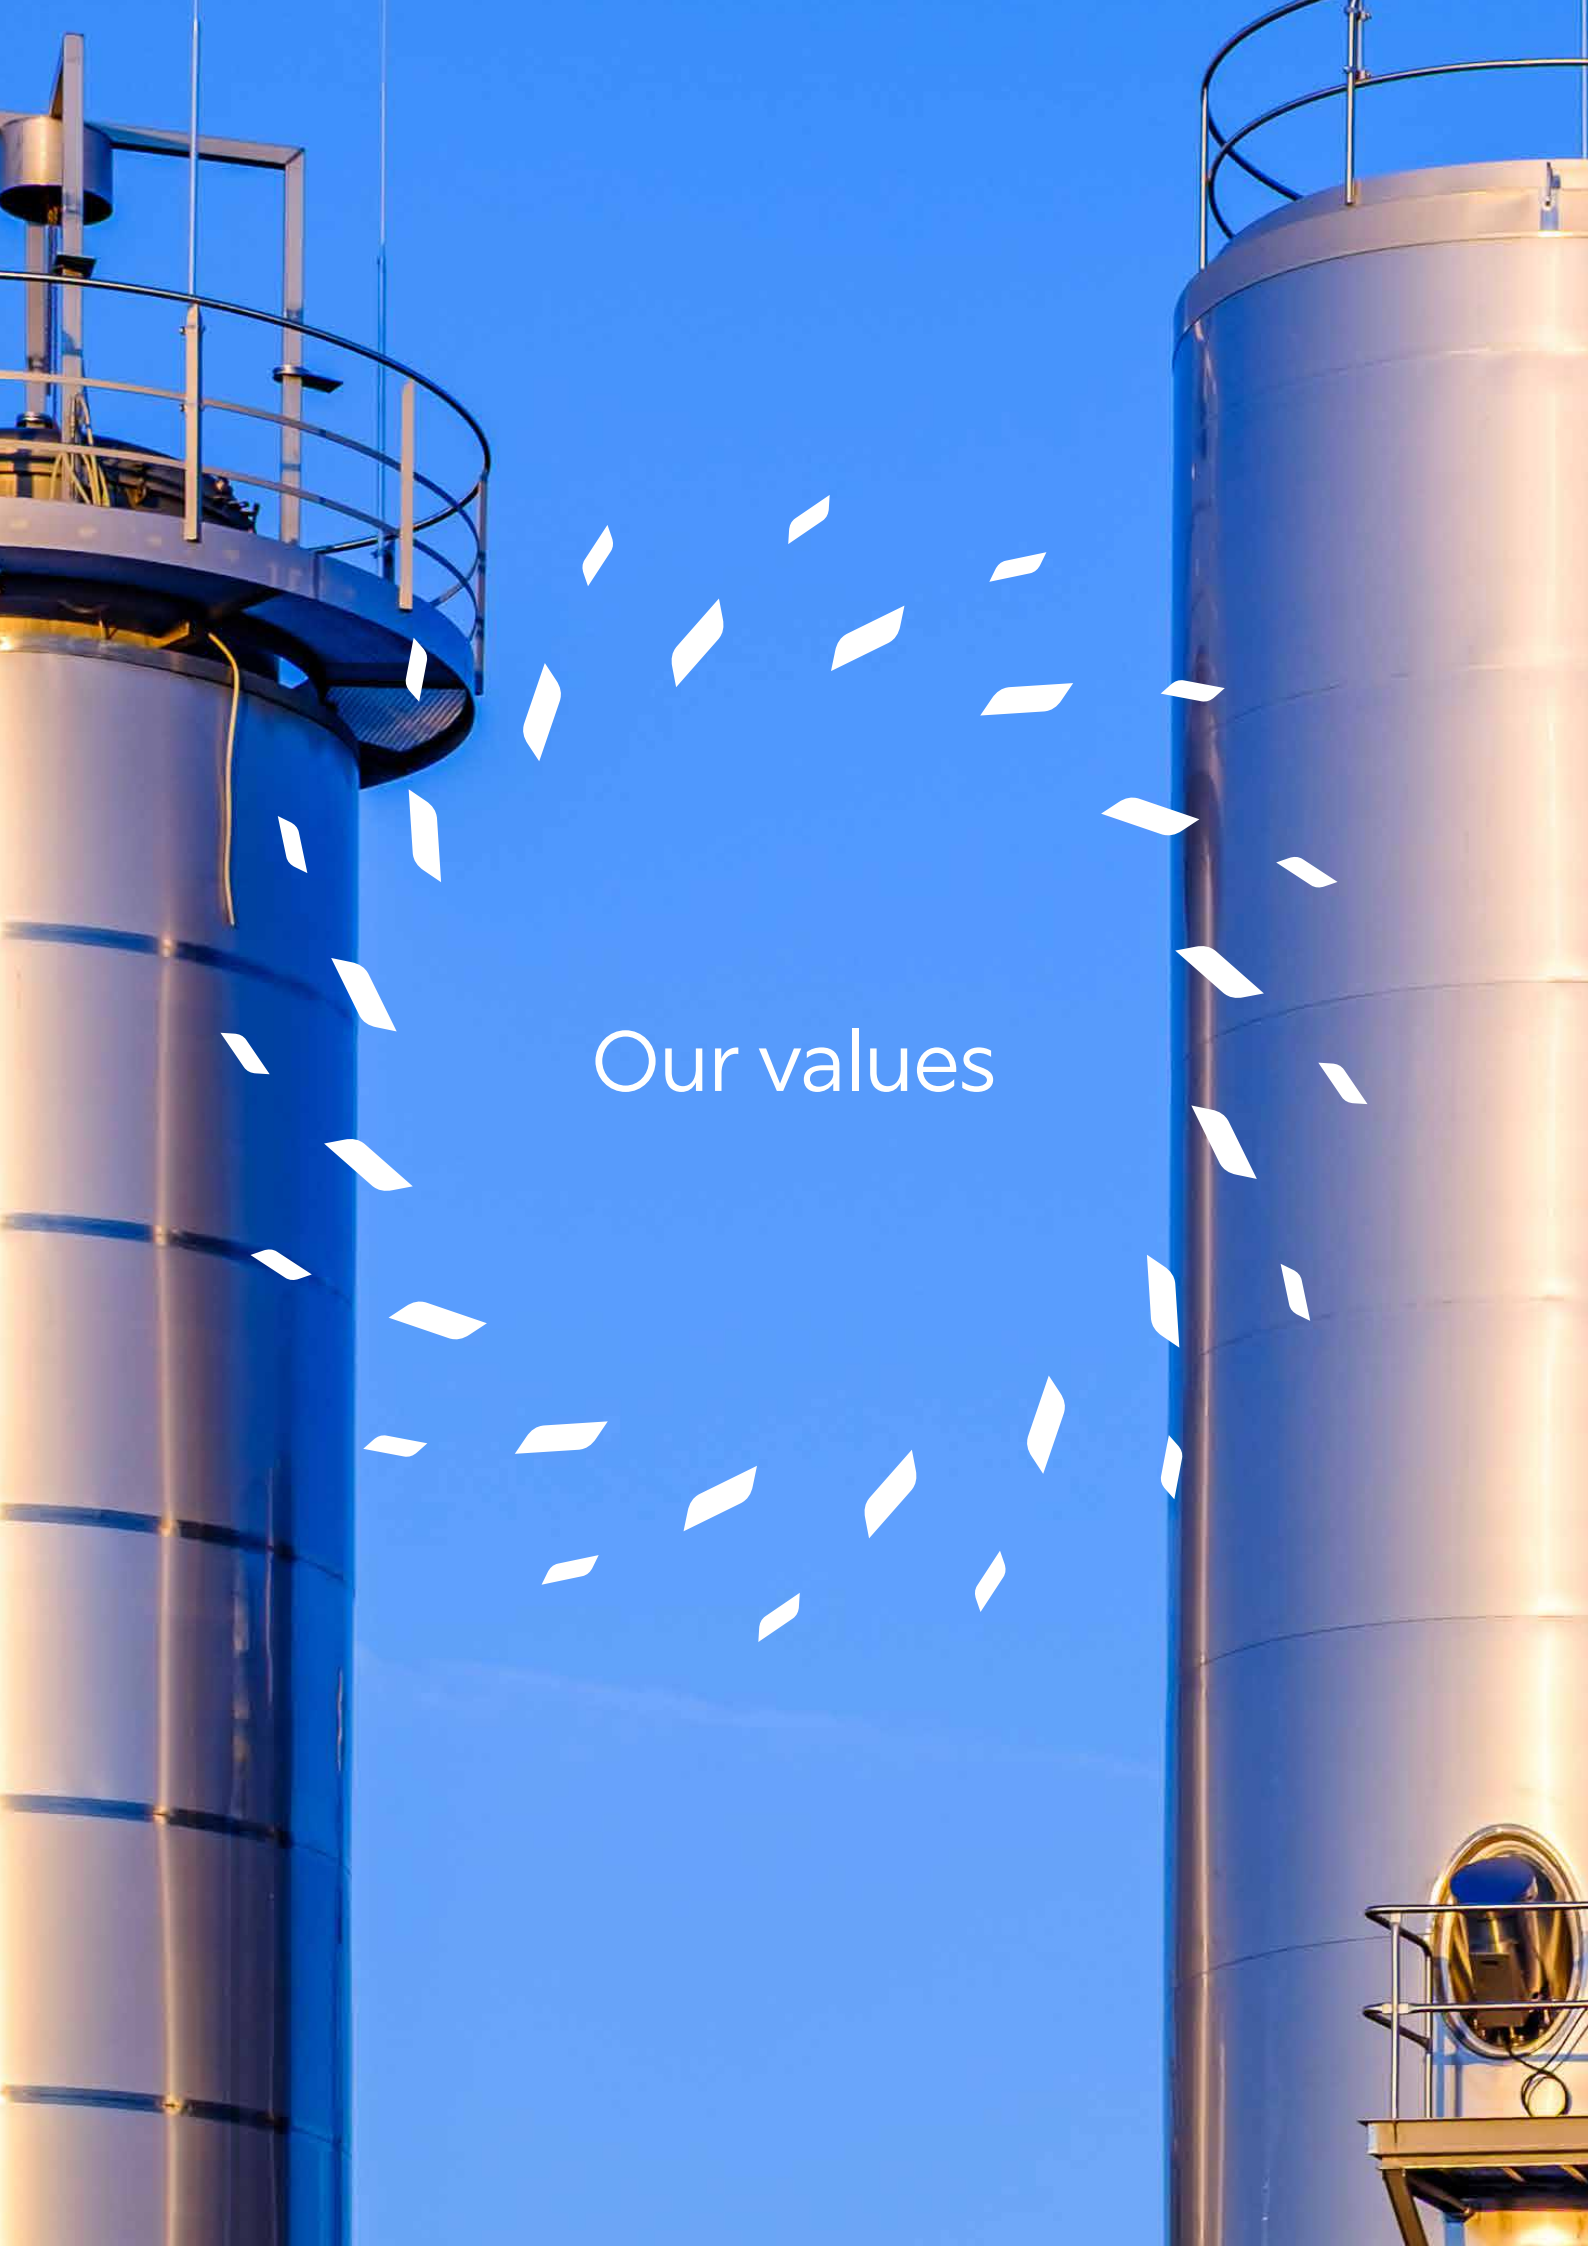

Shelter means refuge.

And that is exactly what
we want to be for our stakeholders.

A place, before even being a service, where they can rely on competent, trustworthy people guided by concrete values such as respect, transparency, and collaboration.

A safe point of reference when the context becomes complex, a solid presence capable of providing technical support, clarity, and an understanding of needs.

The background of the image shows two large, cylindrical industrial towers, possibly distillation columns, made of metal with horizontal bands. They are set against a clear blue sky. The scene is lit with a warm, golden light, suggesting sunrise or sunset. Numerous white, rectangular confetti-like shapes are scattered across the sky, creating a celebratory atmosphere.

Our values

We are an efficiency accelerator.

WHO WE ARE

Our mission is to make business processes simpler, faster, and more sustainable.

We strategically coordinate resources, technologies, and expertise to transform complexity into value.

We transform complexity into value

OUR APPROACH

Our support consists in building shared solutions that simplify business processes, unlocking potential to generate concrete and measurable change.

We optimize

We reduce costs, time, and impacts to make processes more efficient.

1

We support

We provide technical expertise and strategic vision.

2

We empower

We foster the growth of people, technologies, and projects, unleashing their potential

3

We enable responsibility

We encourage sustainable and lasting change for organizations.

4

Towards an evolved production ecosystem.

OUR VISION

We envision a dynamic production system, capable of evolving rapidly, intelligently, and responsibly. An environment where operational efficiency and environmental sustainability move in the same direction. Every day, we work so that every project we follow represents a step forward toward this goal.

OUR HISTORY

Shelter was founded in 2010 from the shared ambition of a group of professionals in environment, health, and safety, united by the desire to create an independent, sustainable, and competitive consultancy firm, able to operate successfully both in Italy and abroad.

2010

Foundation

Shelter is born in Milan, founded by former colleagues from a multinational in the HSE sector.

2012

Social Commitment

We begin our journey toward social responsibility, culminating in the first Sustainability Report in 2022.

2016

Tap Project

The project that enabled us to grow internationally.

2017

Joining RSK

We acquire 30% of RSK Env. Italia, expanding our services (contaminated site remediation).

2018

Internationalization

Expansion of SHELTER services through new international partnerships.

2021

New Offices

Start of local presence with the opening of branches in Brindisi (2021), Sassari (2022) and Ferrara (2024).

2024

Partnership

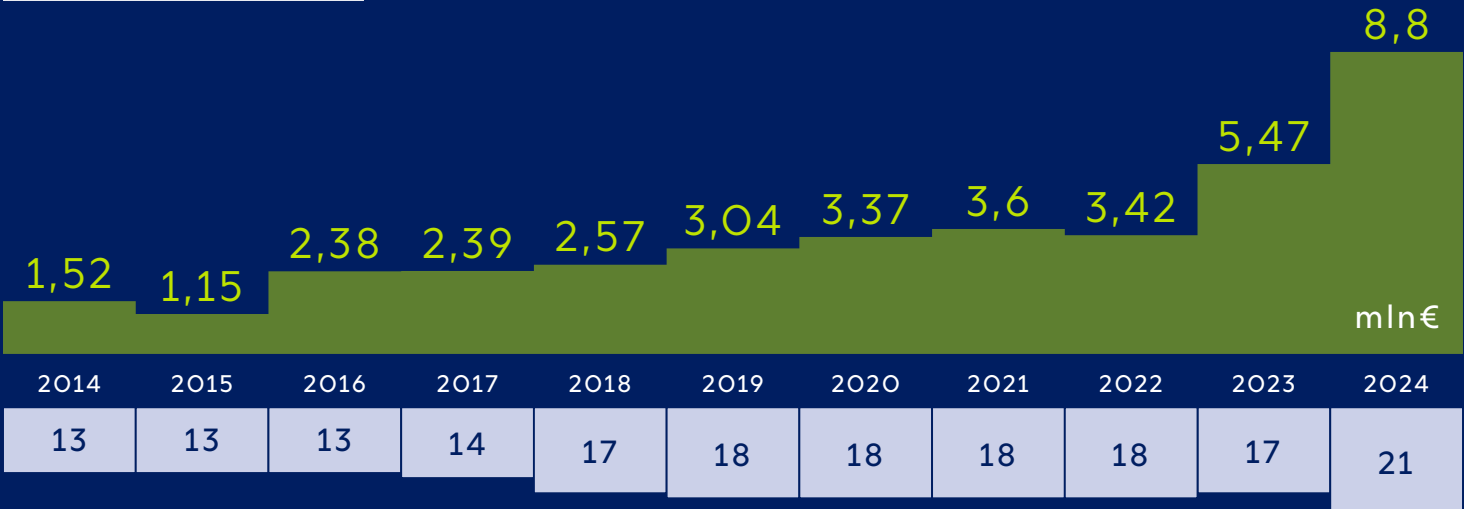

Our partnership structure grows with new shareholders and a new board member.

2025

Internal Remediation

The remediation service is internalized, transitioning from RSK Env. Italia to Shelter.

REVENUE AND EMPLOYEES

The Shelter team

Today we are a multidisciplinary team of over 25 professionals including engineers, geologists, marine biologists, environmental scientists, and other specialists, united by passion, curiosity, and teamwork.

Corporate responsibility and commitment

Since our foundation in 2010, we have adopted a structured organizational approach inspired by international corporate models. The introduction of a quality management system, UNI EN ISO 9001 certified since 2015, has enabled us to define strategic objectives focused on client diversification and service offering. Alongside this, we have committed to environment, health, and safety, demonstrated by UNI EN ISO 14001 certification (since 2015) and UNI EN ISO 45001 (since 2017, previously BS OHSAS 18001).

Sustainability is the value on which our corporate culture is built. For every project, we carefully assess environmental risks and impacts with the goal of eliminating or reducing hazards, protecting both people and the environment.

For us, the integration of ESG (Environment, Social, Governance) criteria is a driver of growth and innovation. Over time, we have consolidated a multidisciplinary team and built strategic international partnerships. Since 2017, we have joined the shareholding of RSK Env. Italia srl (part of RSK Group Limited), managing services in contaminated site characterization and remediation.

Our commitment translates into concrete actions aimed at generating sustainable value for clients, people, and territories.

ENV 70%

Through our technical consultancy services for environmental remediation, we support clients in identifying, assessing, and managing soil, subsoil, and groundwater contamination. We offer specialized expertise to design and supervise effective, safe, and regulation-compliant remediation interventions.

Our approach is based on in-depth analyses, technical modeling, and tailored intervention plans, working alongside a network of experts in environmental engineering, hydrogeology, applied chemistry, and toxicology. This enables us to provide integrated, scientifically robust solutions optimized for environmental risk management.

OUR ACTIVITIES INCLUDE:

- Characterization and assessment of environmental contamination
- Design and supervision of remediation interventions
- Post-intervention monitoring and evaluation of treatment effectiveness
- Contamination and remediation modeling and simulation
- Technical support for regulatory compliance and environmental authorizations
- Assistance in managing complex contaminated sites

Our approach integrates scientific rigor, regulatory updates, and technical communication skills, in support of well-documented and solid legal strategies.

2

Compliance

REM 2%
COM 5%

SSA 11%

PER 12%

ENV 70%

Through compliance services, we support organizations in achieving the highest standards. We design, implement, and verify systems and processes that guarantee full regulatory compliance, respect for authorizations and corporate policies, while promoting continuous improvement in line with international standards. We manage the development, review, and optimization of HSE management systems, as well as training and the dissemination of a culture of safety and sustainability.

OUR ACTIVITIES INCLUDE:

- Gap analysis on HSE regulatory compliance
- Design and development of integrated HSE management systems
- Optimization of existing HSE systems
- System audits and regulatory compliance audits
- Training programs on HSE management systems
- Environmental and HSE monitoring plans
- Integration between HSE system and Model 231
- Implementation of HSE systems in international projects
- Specialist environmental studies
- Greenhouse gas emissions monitoring plans

With solid experience in complex projects with International Oil Companies (IOCs) and EPC (Engineering, Procurement & Construction) companies, we support our clients in developing and managing HSE and industrial risk requirements, also in compliance with local regulations in the countries where they operate.

3

Sustainability Advisory

REM 2%
COM 5%

SSA 11%

PER 12%

ENV 70%

In our approach to sustainability, we combine the rigor of international reporting standards with expertise in auditing, compliance, and ESG performance assessment. We help organizations measure, integrate, and communicate the value generated by their projects across the three sustainability dimensions: environmental, social, and governance (ESG).

We build long-term collaboration paths with our clients, guiding them from the definition of strategic priorities to the implementation, monitoring, and reporting of sustainability policies.

OUR ACTIVITIES INCLUDE:

- Drafting Sustainability Reports and Plans
- Support for Non-Financial Declarations (NFDs)
- Carbon footprint analysis and carbon neutrality planning
- Support within Emission Trading Systems (ETS)
- ESG rating improvement
- Materiality analysis
- Integration of ESG elements in company profiles and tenders
- Energy audits and performance management
- Support for environmental certifications, including LEED

Integrating sustainability into business models is now an essential factor for increasing market competitiveness and reputation.

4

Permitting

REM 2%
COM 5%

SSA 11%

PER 12%

ENV 70%

We support our clients in obtaining the authorizations needed to launch and develop their projects, ensuring full compliance with national, regional, and local regulations, as well as with international reference standards.

We provide assistance at all stages of the permitting process, aiming to simplify procedures, reduce timeframes, and ensure effective dialogue with Competent Authorities. Specifically, we provide support for the granting of Integrated Environmental Authorizations (IEA) and Environmental, Social, and Health Impact Assessments, including the preparation of site environmental baseline studies, where required.

OUR ACTIVITIES INCLUDE:

- Preliminary studies on environmental aspects and impacts (Screening, EnvilD, PEIA)
- Environmental, social, and health impact assessments (EIA, SIA, VINCA, HIA)
- Stakeholder engagement and management
- Drafting and management of IEA and AUA applications
- Assistance with national and local authorizations and permits
- Support for greenhouse gas emission applications
- Modeling studies (noise, air quality, surface and groundwater)

We carry out acoustic, atmospheric, and hydrological modeling studies in line with the highest industry standards, providing sensitivity analyses useful for the final configuration of the project to be authorized.

5

Environmental Monitoring

REM 2%
COM 5%

SSA 11%

PER 12%

ENV 70%

Through environmental monitoring services, we support organizations in obtaining and maintaining authorizations, preparing monitoring plans in line with the technical requirements set by current regulations.

We carry out surveys in terrestrial and marine environments, analyzing physical, biological, and landscape matrices. The data collected provides fundamental information for environmental assessments, calibration of predictive models, and spatio-temporal analyses of local phenomena.

OUR ACTIVITIES INCLUDE:

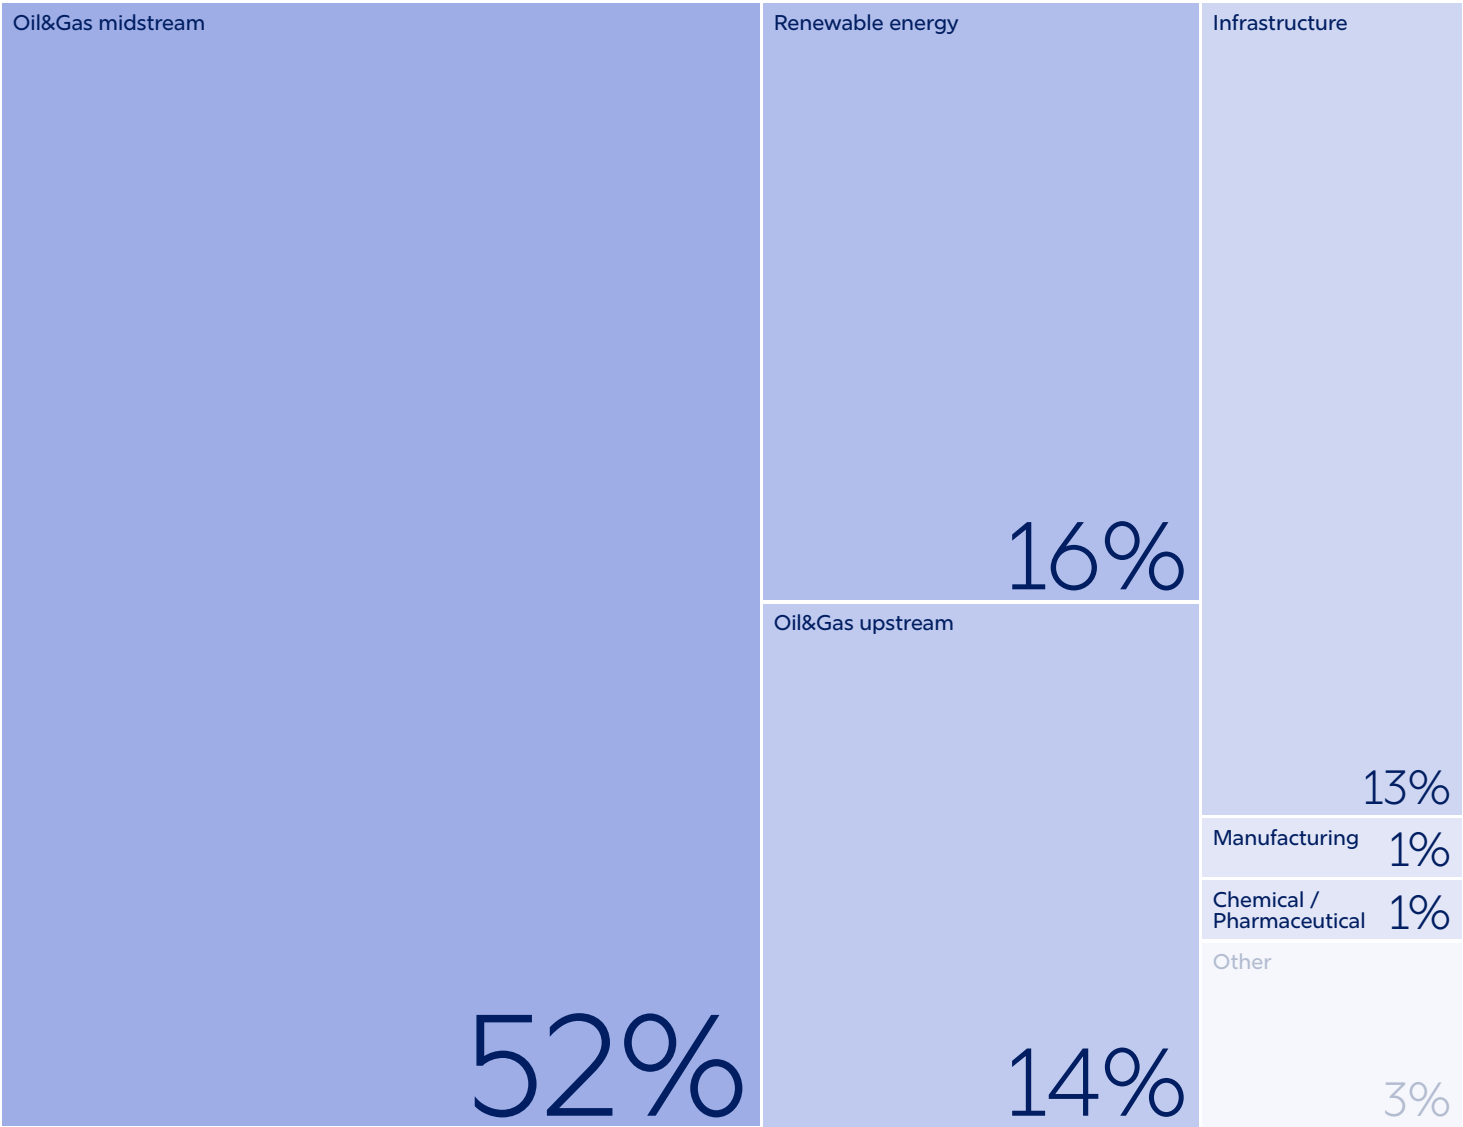

- Investigations on air, soil, subsoil, surface water, groundwater, noise, vibrations, onshore and offshore sediments
- Surveys on fauna, flora, vegetation, ecosystems, and landscape
- Archaeological surveys and waste management studies
- Bathymetric surveys (SBES, MBES) and seabed morphology mapping (side scan sonar, magnetometric surveys, sub-bottom profiler, ROV)
- Topographic surveys and mapping using drones, laser scanners, and multispectral and hyperspectral remote sensing
- Development of geo-databases and data collection and analysis systems (GIS / WebGIS)

We provide comprehensive support in the design and management of environmental monitoring, ensuring the integration of results into project decision-making and authorization processes.

Our sectors

SECTORS

We operate in strategic sectors for industrial development and the energy transition, with a strong presence in Oil & Gas and constant growth in renewables and infrastructure. Our adaptability allows us to create value also in more specialized contexts, such as chemical-pharmaceutical and manufacturing, always with a technically solid and sustainability-oriented approach.

Corporate Social Responsibility

SOCIAL PROFILE

Since the start of our operations, we have been committed to contributing to community well-being by supporting initiatives aligned with our values of social responsibility. We believe that protecting the environment also means supporting the people who live in it. This is why we continue to back socially beneficial projects, both locally and beyond. Below is a summary of the main initiatives we have supported.

Fondazione Francesca Rava NPG Italia ETS

As part of our commitment to social responsibility, Shelter is proud to support Palla al Centro, an initiative by the Francesca Rava Foundation – NPH Italia ETS, dedicated to fostering inclusion and personal growth within the Cesare Beccaria Juvenile Detention Center.

Through art therapy sessions, practical workshops, and sports and cultural activities, the project creates meaningful opportunities for dialogue and connection between the inside and the outside world. It offers a renewed sense of possibility to young individuals navigating a difficult period in their lives. Our contribution represents a small but heartfelt gesture of support for the Foundation's mission: to help these young people rediscover their self-worth and envision a different, better future.

Leone Moressa Foundation

Foundation responsible for studying immigration, multi-ethnic relations and the impact of migration policies, preparing an annual report and organizing events, seminars, debates, training and awareness-raising courses aimed at improving conditions for social integration. We contribute annually to support the foundation.

SOS Children's Villages

Worldwide organization founded in Austria in 1949. Provides support to children without family care or at risk of losing it. It guarantees each of them the right to grow up peaceful and healthy in a welcoming family environment, developing their full potential.

Long-distance adoption: through this association, we long-distance adopted an Ethiopian child whose father was orphaned and who was estranged from his mother, who was having financial difficulties in providing for him. We supported this child in his daily life and studies, since the successful graduation. A new child was then assigned to Shelter to continue our support.

Shelter with FAI to Protect Beauty and Create Value

In 2024, we renewed our commitment to protecting Italy's cultural and environmental heritage by joining the Corporate Golden Donor program of FAI – Fondo Ambiente Italiano. This initiative aligns with our sustainability approach, which integrates environmental, social, and territorial responsibility.

FAI is committed to preserving and promoting Italy's historical, artistic, and natural heritage, while encouraging public access and awareness. Through restoration, education, and civic engagement, it contributes to a more conscious and livable country. Supporting FAI is a concrete step in our effort to create lasting, positive impact on both society and the environment.

Palla al Centro: building future through education and opportunity

As part of our commitment to social responsibility, Shelter is proud to support Palla al Centro, a project by the Francesca Rava Foundation – NPH Italia ETS, dedicated to creating a space for inclusion and growth within the Cesare Beccaria Juvenile Detention Center.

Through art therapy workshops, practical training, and sports and cultural activities, the initiative builds bridges between the inside and the outside, offering meaningful opportunities to young people during a challenging stage of their lives.

Our support represents a small but heartfelt contribution to the Foundation's mission: guiding these young individuals on their path of rebirth, helping them recognize their value, and imagine a different, brighter future."
