Grove Central named a 2025 Project of the Year Finalist

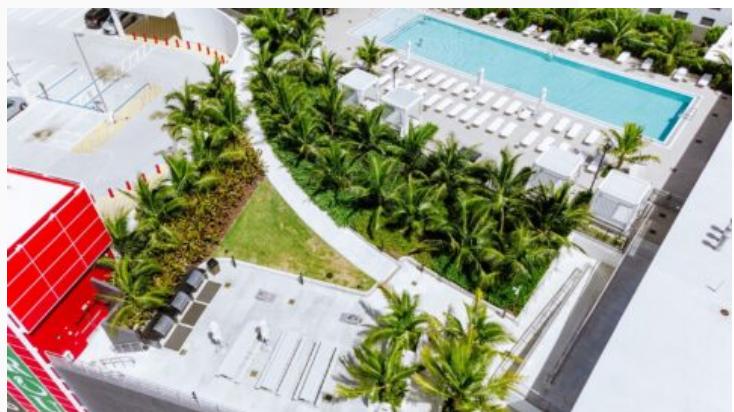

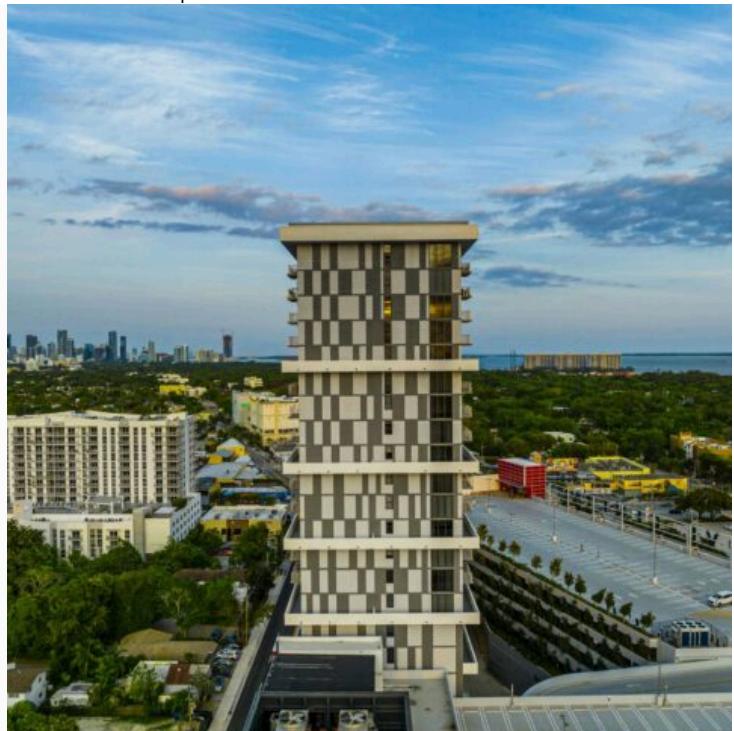

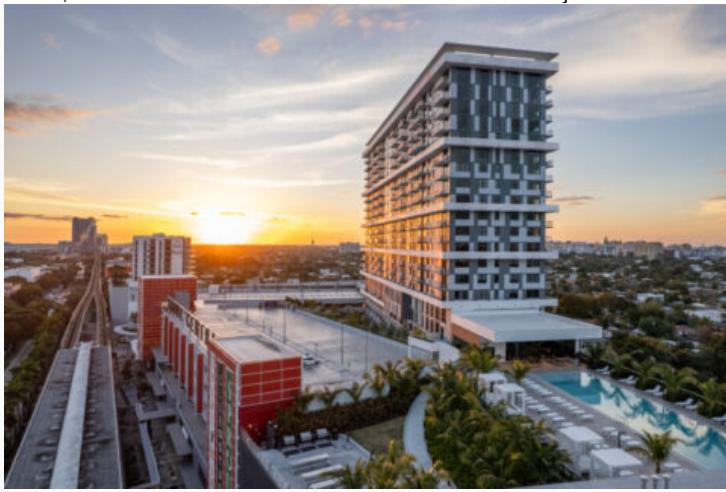

Grove Central*Location: Coconut Grove, Miami*

A P3 mixed-use, transit-oriented development

Grove Central is a transformative, transit-oriented development by Terra and Grass River that has redefined the commercial and residential landscape of Coconut Grove. Strategically positioned at the intersection of US1 and SW 27th Avenue, the project combines a multi-modal transit hub with a 23-story residential tower featuring 402 multifamily and workforce housing units, a 1,250-space public parking garage, 170,000 square feet of retail, and a series of public realm improvements. What was once a vacant lot adjacent to the Coconut Grove Metrorail station has become a national model for smart growth – merging density, walkability, transit access, and activated street-level retail in a vertically integrated development that prioritizes resilience and community connection.

GROVE CENTRAL
