

MEMORANDUM

To: Vinson Hall Retirement Community Staff Members, Residents,
Family Members, Contractors and Volunteers

From: Libby Bush, CEO, Rick Bova, COO/CFO and Lisa Desmond,
Senior Director of Clinical Operations

Subject: COVID-19 Updates

Date: August 17, 2021

Today, we are sending a list of current updates, as we closely monitor the surge of COVID-19 variant infections across our country.

- At VHRC, we continue to have no detected COVID-19 cases among staff or residents. Fairfax County is now at 4.4 percent test positivity rate per the Virginia Department of Health PCR positivity tracker. This positivity rate means there is substantial spread of the virus in the community around us.
- The total vaccination rate for all VHRC residents – campus-wide – is 99.4 percent; 87 percent of all VHRC staff are also vaccinated.
- Staff, residents and visitors continue to be required to wear masks in all public areas on campus; staff are also required wear masks in resident apartments or rooms.
- Staff testing protocol remains the same.
- All staff members are mandated to receive the vaccine by mid-September.
- Our clinical team is taking the final steps for VHRC to be a COVID-19 vaccine provider.

Continued on the reverse side.

- We are closely following news about the possibility of booster doses for our community.

Finally, we want to let you know that Libby was interviewed by a *Washington Post* reporter on Tuesday, and we believe VHRC will be featured in the *Post* in the coming days. It was an honor to highlight all who live and work here, and how we have come together throughout this pandemic.

Please know we will update you with any further developments as appropriate. In the meantime, take good care.
