

Innovative Solutions for a Sustainable Economy

CONSISTING OF THREE FLEXIBLE COURSES WITH REAL-WORLD IMPACT

InGenious – Responsible Innovation for a Sustainable World (3 ECTS)

- Learn to design innovations within ethical and sustainable frameworks.
- Apply the principles of responsible innovation through real-life case studies.

Business Modelling in the Circular Economy (2 ECTS)

- Understand how to create circular business models
- Gain practical experience by developing circular business ideas in collaboration with peers.

The sustainable forest challenge: How to make the forest viable

InGenious – Sustainable Cities and Communities:

An Interdisciplinary Future Project (5 ECTS)

- Collaborate with external partners on sustainable forests that promote ecological balance and social well-being.
- Includes a mobility week from March 3 – 7, 2025 at Linköping University, Sweden, through a Erasmus blended intensive program.

Take the courses individually or together for a comprehensive experience.

WHAT YOU CAN EXPECT:

The course package equips you with the tools and insights for creating a sustainable future. This unique learning opportunity combines theoretical knowledge with practical experiences, empowering you to:

- Develop innovations and business models grounded in circular, responsible, and caring principles.
- Explore alternative economic models such as circular and postgrowth economics.
- Lead sustainable projects that transform businesses and societies.
- Build skills to act sustainably in an ever-changing global context.
