

As proposed, the MVP Southgate project is an interstate natural gas pipeline system that spans approximately 31 miles from southern Virginia to central North Carolina. MVP Southgate will be developed, constructed and owned by Mountain Valley Pipeline, LLC (Mountain Valley), and it will be regulated by the Federal Energy Regulatory Commission (FERC).

MVP Southgate will be 30 inches in diameter and will require a 50 feet wide permanent easement, with up to an additional 50 feet wide temporary easement during construction (for a total of up to 100 feet during construction, depending on conditions). Construction is expected to start in 2026, following receipt of all necessary permits and approvals.

Here is an overview of the construction process:
