

Year-End Platform Enhancements & New Capabilities

As we close out 2025, we're excited to share several meaningful improvements across mobile workflows, observations, training, and reporting—designed to give teams more control, clarity, and efficiency in the field and in the office.

To give you continued confidence in our platform, RTRS has completed its 2025 SOC 2 Type II audit, independently verifying our security, availability, and data-protection controls.

Mobile Form Enhancements

Reordered Images in Mobile Forms

Internal mobile form views now include enhanced editing functionality. When editing a form, users can **reorder images directly in edit mode**, ensuring photos display in the exact sequence you want—perfect for inspections, incident documentation, and audits.

Clearer Edit Alerts

When a form is edited, alerts now identify **the user who made the edit**, rather than the original form owner. This improves transparency and accountability across teams.

Coming Soon: Form Audit Tracker

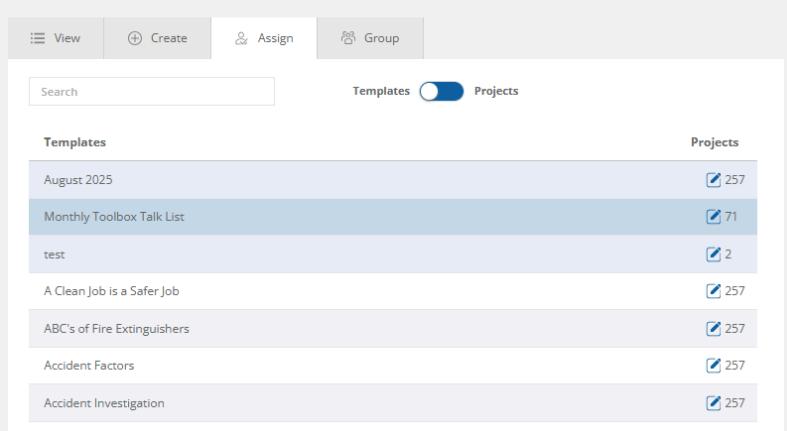

We will be rolling out a **new audit tracker for forms**, allowing administrators to see **what changed, when it changed, and who made the change**—adding an additional layer of governance and compliance visibility.

Toolbox Talk Improvements

Assign Groups from List View

Users can now **assign Toolbox Talk Groups directly from the list view**, eliminating extra steps and making it faster to distribute talks to the right audiences.

Toolbox Talk Templates

The screenshot shows a software interface for managing Toolbox Talk Templates. At the top, there are buttons for 'View', 'Create', 'Assign', and 'Group'. Below that is a search bar and a toggle switch between 'Templates' and 'Projects'. The main area is divided into two sections: 'Templates' on the left and 'Projects' on the right. The 'Templates' section lists several entries with their creation dates and counts: 'August 2025' (257), 'Monthly Toolbox Talk List' (71), 'test' (2), 'A Clean Job is a Safer Job' (257), 'ABC's of Fire Extinguishers' (257), 'Accident Factors' (257), and 'Accident Investigation' (257). The 'Projects' section shows a single entry with a count of 707.

Templates	Projects
August 2025	257
Monthly Toolbox Talk List	71
test	2
A Clean Job is a Safer Job	257
ABC's of Fire Extinguishers	257
Accident Factors	257
Accident Investigation	257

707

🎓 Training Available on Mobile

Training is accessible from **Android mobile devices**, enabling employees to:

- Complete assigned training in the field
- Review materials on demand
- Stay compliant without returning to a desktop

This update supports mobile-first teams and reduces delays in training completion.

🌐 Website Enhancements

We've completed a full redesign of **seven additional webpages**, continuing our effort to improve clarity, performance, and usability across the RTRS website.

More enhancements are planned as we head into 2026.

🔗 Stay Connected

We'll continue rolling out updates that improve usability, data integrity, and actionable insights across the platform.
