SEAM Energy Efficiency Policy

SEAM document ID:	Date:	Prepared by:	Approved by:
H003-V7 Energy efficiency Policy_rev03	2026-11-09	BBa	CS

SEAM is committed to comply with all applicable legal requirements regarding energy efficiency at the workplace. SEAM will also strive to implement projects that help minimize or reduce energy use in the office building or during operations.

We believe that the best way of preventing unnecessary energy use is to identify possible energy waste and implement good energy efficient appliances and have an energy management system to detect any anomalies.

Our energy efficiency goals and policies are:

- To follow national guidelines for building structures, energy consumption and appliances
- To educate and change behaviour patterns of employees to contribute to less wasteful use of energy
- Reduce energy consumption by utilizing modern appliances and tools to help against energy waste
- Avoid unnecessary use of energy by having an industrial control system to optimize energy usage in the office building
- Communicate our energy efficiency policy commitment to clients, customers and the public and encourage them to support it
- The company will continuously strive to use energy-efficient products and services to keep
- improving our energy use and minimizing energy waste
- Continuously improving our energy efficiency keeping up to date on appliances and spreading awareness amongst employees
- To utilize green and renewable energy as much as possible

Chief Executive Officer
Cheuwon Shin
