

Assist-Me Chat Client Designer

Anyone can design a conversational interface for website, app or phone

converse360's Assist-Me portal empowers organisations to create customised interfaces such as Chatbots and Digital Assistants that engage your audience on your website, within apps and on the phone.

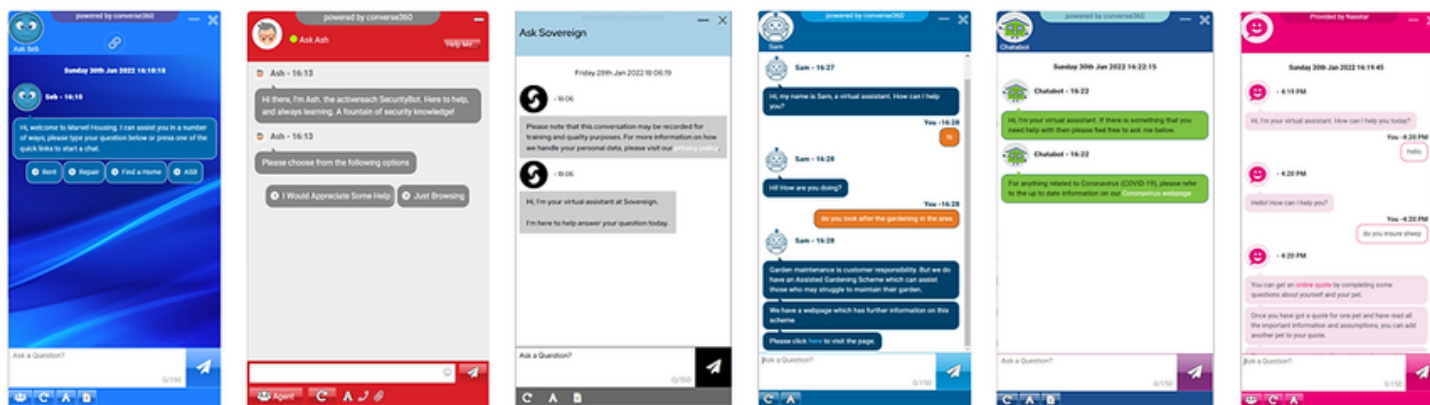

Connect your audience with your data and knowledge to provide them with a truly personalised interaction.

The platform incorporates a simple to use no-code visual chat designer making it easy for anyone to create a chat client and customise all aspects of the branding through an intuitive web portal.

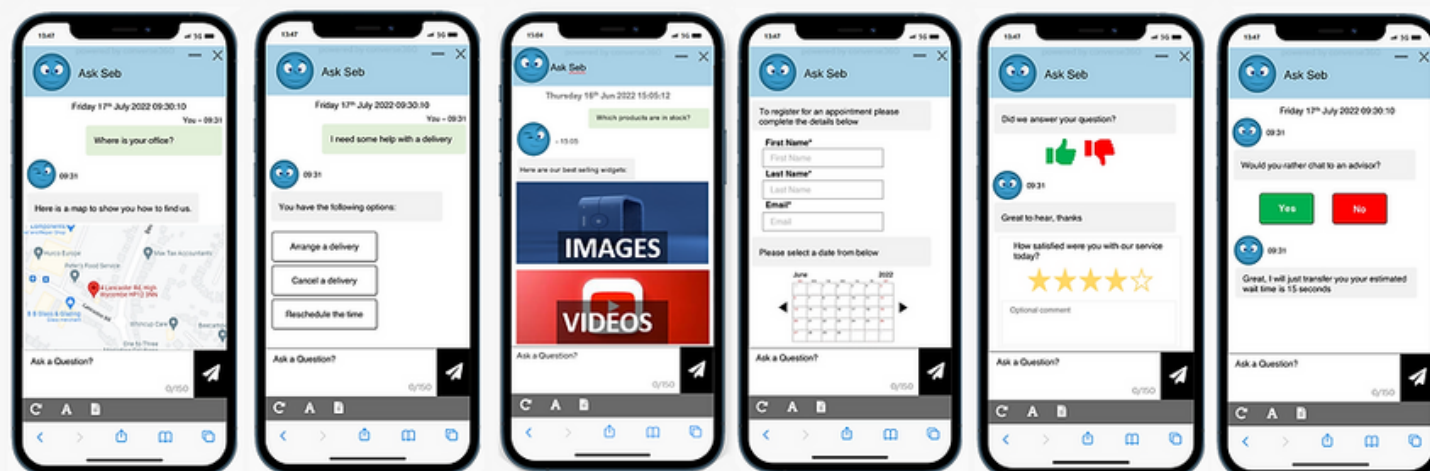

Customisable user interface

Design, create and publish digital interfaces for web, speech and avatars. Easily customise all aspects of your web client or app interface in line with your brand guidelines including website prompts, personas, headers, footers, backgrounds, chat bubbles, icons and more.

Adaptable Universal Chat Client

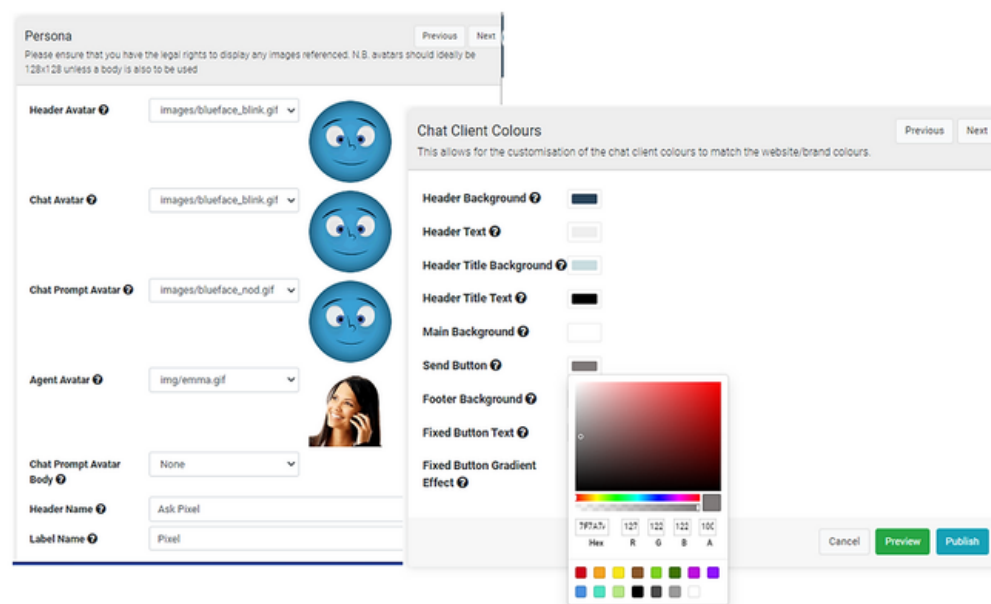

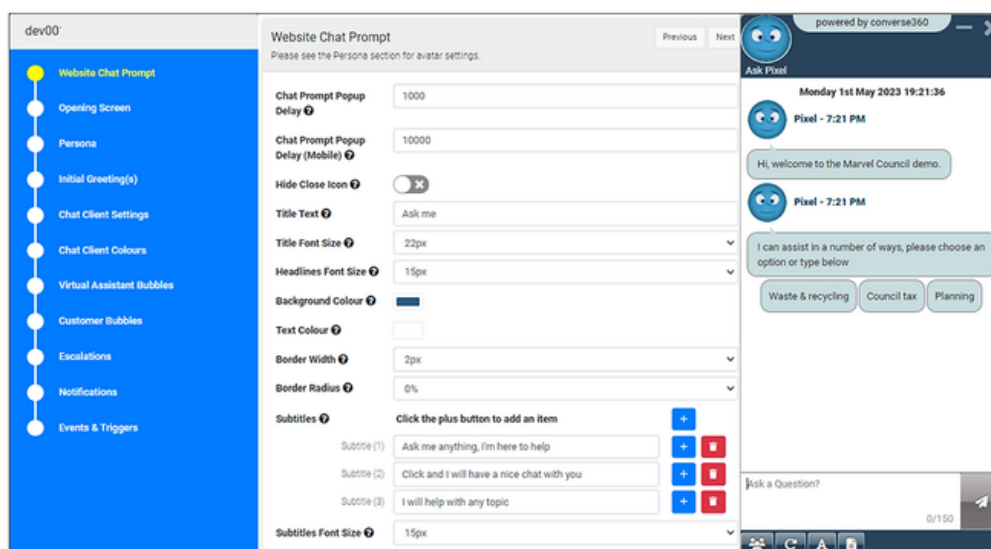

Offer more than text-based interactions and communicate with your audience with rich content. Present information in beautiful and engaging media formats that help them resolve their enquiry. Add text, buttons, images, maps, videos, forms, surveys, calendars, payment options and more.

Quick and easy to add your branding

Completely customisable web interface to follow your brand guidelines:

- Add logos, choose fonts, select colours and button types
- Create your digital persona and include animations to attract your audience
- Select your choice of buttons, images and sounds
- Preview your design and publish in minutes

About converse360
