PROLOGUE

Achieving a Sustainable World
Embodied in Humanity in the Age of AI

PEACE
PURPOSE
PERSONHOOD

The Future Innovation Summit Trilogy transcends borders, fosters cooperation, and elevates communities. This prestigious series of summits blends thought leadership, cultural immersion, entertainment, and world-class exhibitions — creating a platform where every attendee's voice and vision can contribute to shaping economic and social outcomes.

An unparalleled, once-in-a-lifetime experience. And this is only the beginning.

INTRODUCING

INTRODUCTION

The Future Innovation Summit is a global platform uniting the world's leading innovators, investors, governments, academics, and philanthropists to shape solutions for the defining challenges of our time.

Founded and chaired by Adnan Al Noorani who partnered with Karla Klingner to expand the global footprint and assist in the balancing of tradition and technology —together, the Future Innovation Summit has become synonymous with wisdom-led innovation, purpose-driven collaboration, and action-oriented dialogue.

More than a conference, the Future Innovation Summit is a curated journey across three iconic destinations. From world-class keynote sessions to immersive cultural experiences — Arabian nights in the desert, yacht dinners on Dubai's skyline, private tours of the Vatican,

and Abu Dhabi's majestic heritage — each summit creates opportunities for meaningful connections, deal-making, and long-term partnerships.

With a trilogy of flagship events planned in Dubai, Vatican City, and Abu Dhabi, the Future Innovation Summit convenes C-suite executives, diplomats, global investors, leading academics, and family offices in exclusive, high-value settings. Each summit is designed not only to spark conversation but to deliver tangible outcomes across AI, sustainability, food security, education, healthcare, and finance.

The Future Innovation Summit stands at the intersection of culture and innovation, offering delegates an environment that is transformational, memorable, and deeply impactful.

COMPANY OVERVIEW

ABOUT US

The Future Innovation Summit (FIS) is a wisdom-led global event series connecting innovators, governments, investors, and academics to deliver purpose-driven solutions.

FOUNDED

2021

HQ

Dubai, UAE.

MISSION

To transform dialogue into actionable solutions that drive sustainable global development.

VISION

To become the world's leading summit series bridging cultures, sectors, and generations.

SCALE & REACH

Global — with events in Dubai, Abu Dhabi, and the Vatican, and target audiences in UK, US, Europe, India, Latin America, and Africa.

FIS is more than a conference. It is a curated journey that combines world-class thought leadership with immersive cultural experiences, creating unique opportunities for cross-cultural collaboration.

MORE THAN A CONFERENCE — A CURATED SUMMIT JOURNEY

The Future Innovation Summit is not a typical conference; it is an immersive, action-driven journey that blends knowledge, connection, and discovery. Every element is designed to deliver real value, meaningful impact, and lasting returns on your time and investment.

At FIS, delegates will:

- **Foster Deeper Networks:** Build relationships that matter through shared experiences, cultural immersion and purposeful encounters.
- **Connect with Place:** Engage in high-level executive dialogues rooted in cultural significance and inspired by each location's heritage and vision.
- **Create Lasting Memories:** Take away an unforgettable imprint that sets this summit apart from any other global gathering.
- **Leave with a Community:** Join a collective committed to collaboration, opportunity, and long-term partnership.
- **Engage in Provocative Dialogue:** Participate in conversations designed to navigate this unprecedented moment in human history with wisdom and clarity.
- **Access Deployable Solutions:** Receive tangible outcomes — actionable deliverables that can be adapted to meet the needs of your professional community.

At the Forefront of Change

Guided by the UAE's visionary Master Plan — a decades-long roadmap integrating AI, sustainability, and innovation to shape a thriving future for the nation and the world — the Future Innovation Summit carries this message globally. It is an invitation to those bold enough to be early adopters, to stand at the leading edge of change.

Adnan Al Noorani
Founder

Adnan Al Noorani is the Founder of the Future Innovation Summit and Chairman of Leo Investments, D1 Technologies, Apollo Management, and H2.H General Trading.

Recognised as one of the top 40 leaders in the GCC and a trusted financial and geopolitical advisor to the royal families, he is dedicated to advancing the UAE's position on the global stage and building meaningful connections across international communities.

In the same year he founded D1 Technologies, a company focused on delivering innovative solutions across sectors including sustainable blockchain, supply chain technologies, and the Metaverse. Alongside this, his investment firm, Leo Investments, has become a trusted platform for investors seeking opportunities in the GCC and beyond. Under his leadership, his group of companies continues to foster cross-border partnerships and create a thriving environment for business and innovation.

In October 2021, Adnan launched the Future Innovation Summit, one of the largest

semi-government conferences and exhibitions in the MENA region. Its founding vision is to build bridges without barriers between governments and the private sector, uniting stakeholders to deliver solutions that improve lives worldwide. He is known for his thoughtful leadership around his “human to human” or “H2H” approach to diplomacy and business that has positioned him as a Top 200 Leader in the Arab world and gained attention from faith-based leaders around the globe.

Highly regarded for his humanitarian work, Adnan has supported numerous charities and community initiatives, always advocating for those in need. With more than 19 years of experience working with royal investments and businesses across the GCC, he is recognised as a leader whose vision is to create a sustainable and prosperous future for generations to come.

LEADERSHIP

Adnan Al Noorani and Karla Klingner are two sides of the same coin, bringing together complementary strengths to shape the Future Innovation Summit. Adnan's technical and financial expertise, vision and determination to build bridges without barriers meet Karla's wisdom, pragmatism, and global agricultural expertise. Together, they embody the balance of East and West, innovation and tradition, purpose and action — a partnership that lies at the heart of a summit series designed to transform ideas into outcomes and create a future led by peace, purpose, and personhood.

Karla Klingner
Co-Founder & Board Advisor

Karla Klingner has built a diverse and distinguished career at a pivotal moment in American and international agricultural history. Raised on a Missouri-Iowa farm, she has

evolved from a general litigation attorney to a leader in agricultural and water policy, an immigration counsellor, and an international trade and market intelligence expert with particular insight into US-China relations. Across every chapter of her career, Karla has remained true to her rural roots, bringing a grounded, common-sense approach shaped by her upbringing and years of global experience.

A graduate of the University of Missouri, Karla earned both her Bachelor of Science in Agriculture (summa cum laude) and her Juris Doctorate. Guided by the words of Maya Angelou — “Do the best you can until you know better. Then when you know better, do better.” — she recognised early that her values diverged from the trajectory of modern agricultural practices and policies. She saw how multinational conglomerates, through lobbying, were shaping outcomes at the

expense of farmers and consumers, and foresaw the shift that would come when technology enabled farmers to market directly.

Over the past seven years, Karla has worked to create and deploy systems that address supply chain and processing challenges at the heart of agriculture. Through her leadership at Palindromes Inc. she is positioning the organisation as a scalable, solution-driven enterprise capable of spearheading a global movement to “nourish and heal the world.”

THE TRILOGY

DUBAI

DUBAI, UAE: 10–11 November 2025

AI & Sustainability: Five Steps Closer to a Better Future
Conference, Interactive AI & Business Development

Cultural Immersion & Meaningful Networking: 12–13 November 2025

As the first of the FIS Trilogy events, Dubai sets the stage in the City of the Future. With its unique balance of preserved heritage and world-leading innovation, Dubai is the perfect hub for global collaboration and bold new ideas.

Here, visionaries, investors, policymakers, and innovators will explore the five key steps shaping our collective future: AI, sustainability, education, healthcare, and finance.

Beyond the conference hall, delegates will enjoy cultural immersion — Arabian nights, yacht receptions, and moments of authentic connection. This is your chance to sit, sip tea, and share with the greatest minds, leaders, and doers of our age.

VATICAN CITY

THE VATICAN: 25–26 June 2026

Human-Centric Innovation: Shaping a Sustainable and Ethical Future, Historic Summit.

Galas, Tours & Exclusive Experiences: 26-27 June 2026

The Holy See has called for open dialogue on AI's disruptive potential, its risks, and the need to uphold the intrinsic dignity of every man and woman. Future Innovation Summit is answering that call. This gathering marks a defining moment in human history — The Vatican as the stage, and humanity in the modern age as the subject.

FIS will unite diplomats, business leaders, academics, scholars, faith representatives, non-profits, tribal leaders, and individuals determined to ensure that the next era of technological development advances justice and peace. Be deliberate. Be bold. Be part of shaping a future that works for all societies

ABU DHABI

ABU DHABI, UAE: 10–11 November 2026

Innovating for a Resilient Future: Tech, Finance & Sustainability in a Global Era. Conference, Exhibition & Business Development.

Cultural Experiences & Networking: 12–13 November 2026

The Emirate of Abu Dhabi embodies a legacy of heritage and values balanced with forward-looking leadership. Just as the Peregrine Falcon on its crest honours tradition while soaring towards new horizons, Abu Dhabi represents the fusion of cultural preservation and bold innovation.

This summit reflects the UAE's ambition to become the first government in the world powered 100% by AI in services and data analysis, aligned with the UAE Centennial 2071 Plan. A showcase of vision and opportunity — and an unmissable chance to see where your future fits into the UAE's story of transformation. Together, we can build a better tomorrow.
