COMMENTARY

Returns in March (-17%) were the second worst since the Fund launched ten years ago, sandwiched between the COVID crash months of March 2020 (-36%) and February 2020 (-11%). In relative terms Cape Wrath typically performs best/worst in environments of rising/falling risk appetite. Hence the COVID crash saw the Fund lose 49% in nine weeks, whilst our UK Equity Benchmark lost only 35%. Investors have done well in this strategy, historically, when buying after a drawdown. In the 12 months following the March 2020 trough, we saw four of the Fund's five best-ever months, including 14% in April 2020, 29% in November 2020 and 15% in February 2021. From the COVID trough, the Fund recovered its previous high in 11 months (the Benchmark was still down 10%) and after 15 months had returned 121% (the Benchmark was up 51%). Past performance is never a guide to the future, but human nature is a constant, and the cycle of investor emotions is as old as markets.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to generate capital growth over the long term by typically investing at least 70% in a concentrated portfolio of UK listed equities. The Fund follows a value philosophy, looking for situations in which investors have over- reacted to events and valuations no longer reflect company fundamentals. The best opportunities are often found after a period of disappointment has created emotional reasons not to invest. Every investment requires a clear catalyst, which impacts on earnings, or the multiple the market applies to those earnings.
